(xi, 1892).....                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 600      |
| Effect of Haloid Potassium, on Potassium Sulphate. (Blarez.) (x, 1891).....                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 698      |

## Salts—cont.

|                                                                                                                                                         |          |
|---------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| Effect of Metallic, on Development of Colouring Matters. (Caberti and Peco.) (xiii, 1894).....                                                          | 946      |
| Efflorescence of, from Clay. (viii, 1886).....                                                                                                          | 984      |
| Electro-Chemical Decomposition of Solutions of. (P) (Richardson.) (xiv, 1895).....                                                                      | 280      |
| Electrolysis of: (P) Crane. (xii, 1893).....                                                                                                            | 769      |
| (P) Hargreaves and Bird. (xiii, 1894).....                                                                                                              | 886, 886 |
| Electrolysis of Fused. (Vautin.) (xii, 1894).....                                                                                                       | 448      |
| Electrolysis of Melted Haloid. (P) Rennerfelt. (x, 1891).....                                                                                           | 147      |
| Electrolysis of, Process and Apparatus for. (P) Blackmore. (xiv, 1895).....                                                                             | 280      |
| Electrolytic Apparatus for Decomposing Metallic. (P) (Kellner and Hallein.) (xiv, 1895).....                                                            | 1047     |
| Electrolytic Decomposition of Alkaline: (P) Casner. (xii, 1893).....                                                                                    | 768      |
| (P) Rosenbaum. (xiv, 1895).....                                                                                                                         | 1048     |
| (P) Sinding-Larsen. (xiii, 1894).....                                                                                                                   | 1206     |
| Electrolytic Production of. (P) Luckow. (xiv, 1895).....                                                                                                | 975      |
| Electrolytical Decomposition of Metallic. (P) Kellner. (xii, 1893), 162, 277: (xiv, 1895), 809                                                          |          |
| Electrolytical Separation of Bases of. (P) Vautin. (xiii, 1894).....                                                                                    | 256      |
| Electrolytically Treating Solutions of. (P) Stormer. (xiii, 1894).....                                                                                  | 1067     |
| Extracting and Dissolving Mixtures of. (P) Kisel. (ii, 1883).....                                                                                       | 279      |
| Extraction of Pure Acids from Alkaline. (P) Placet and Bonnet. (xiii, 1894).....                                                                        | 37       |
| Ferricyanide, Preparation of. (Kassner.) (xiii, 1894).....                                                                                              | 332      |
| Ferrous, Preparation of. (P) Warriek. (xiii, 1894).....                                                                                                 | 275      |
| From Brine and Solutions, Means for Recovering. (P) Williams. (xii, 1893).....                                                                          | 43       |
| From Sugar-Beet Molasses, Extraction of Saltpetre from. (vi, 1887).....                                                                                 | 639      |
| Fusibility of Isomorphous. (Le Chatelier.) (xiii, 1894).....                                                                                            | 634      |
| Glauber's, Manuf. of, in United States. (Martyn.) (iv, 1885).....                                                                                       | 28       |
| Improving Quality of Alkaline, in Sugar-making. (P) Daix and Possoz. (iv, 1885).....                                                                    | 357      |
| In Lyes, Furnace for Recovering. (P) Dahl. (vi, 1887).....                                                                                              | 442      |
| In Mineral Waters, Recovery of. (P) Boulé. From Kuhn. (ii, 1883).....                                                                                   | 281      |
| In Petroleum, Influence of, on its Luminescence. (Alftan.) (vi, 1887).....                                                                              | 650      |
| In Raw Sugar, Estimation of. (viii, 1889).....                                                                                                          | 991      |
| In Soap, Determination of. (Horn.) (vi, 1887).....                                                                                                      | 681      |
| In Solution, Molecular Refractive Powers of. (Donner.) (ix, 1890).....                                                                                  | 766      |
| In Solutions, App. for Concentrating. (P) Croll. (vi, 1887).....                                                                                        | 820      |
| Infl. of Certain, on Nitrication. (Pichard.) (iv, 1885).....                                                                                            | 460      |
| Influence of Inorganic, on Rotatory Power of Cane-Sugar. (Farnsteiner.) (x, 1891).....                                                                  | 376      |
| Influence of Metallic, on Lactic Fermentation. (Riche.) (xi, 1892).....                                                                                 | 770      |
| Infl. of, on Crystallisation of Sugar. (Nugnes.) (xii, 1893).....                                                                                       | 532      |
| Iron, in United States, Manuf. of. (Martyn.) (iv, 1885).....                                                                                            | 28       |
| Iron, Manufacture of. (P) Hart. (xii, 1893).....                                                                                                        | 763      |
| Lead, Manuf. of. (P) Lake. From Tibbits. (xiv, 1895).....                                                                                               | 285      |
| Lead, Production of Basic. (P) Lurge and Maxwell-Lyte. (xiii, 1894).....                                                                                | 734      |
| Manufacture of. (P) Parker and Robinson. (viii, 1889).....                                                                                              | 778      |
| Melting Points of Inorganic. (Meyer and Riddle.) (xii, 1893).....                                                                                       | 1028     |
| Metallic, as Fixing Agents for Diamine Colours. (Kerzetz.) (xiv, 1895).....                                                                             | 268      |
| Metallic, in Germany. (T.R.) (xii, 1893).....                                                                                                           | 963      |
| Mineral, for Bathing and Drinking, Preparation of. (P) Vincent. (xi, 1892).....                                                                         | 1023     |
| Of Acetone, Solubility of, in Dextrose. (Krug and McElroy.) (xii, 1893).....                                                                            | 176      |
| Of Alkaline Bases, Manufacture of. (Heraite and Duboscq.) (xi, 1892).....                                                                               | 1015     |
| Of Alkalis, Action of Alkaline Bases on. (Engel.) (xi, 1892).....                                                                                       | 237      |
| Of Alkalis, Minimum E.M.F. required for Electrolysis of. (Nourisson.) (xiii, 1894).....                                                                 | 742      |
| Of Alumina, Manufacture of. (P) Augé. (viii, 1889).....                                                                                                 | 393      |
| Of Ammonia, Manufacture of: (P) d'Andria. (viii, 1889).....                                                                                             | 284      |
| (P) McDougall. (iv, 1885).....                                                                                                                          | 214      |
| Of Aromatic Hydroxy Compounds, Action of Sulphur on. (Lange.) (vii, 1888).....                                                                          | 341      |
| Of Benzoyl Sulphimide, Production of Etheral. (Fahlberg and List.) (vi, 1887).....                                                                      | 652      |
| Of Brewing Waters. (Glendinning.) (xii, 1893).....                                                                                                      | 124      |
| Of Calcium, Magnesium, &c., Removing, from Aqueous Solutions. (P) Doremus. (viii, 1889).....                                                            | 845      |
| Of Certain Colouring Matters. (P) Petersen-Müller. (xiii, 1894).....                                                                                    | 725      |
| Of Fatty Acids, Behaviour of Alkaline, to Water. (Krafft and Stern.) (xiii, 1894).....                                                                  | 1207     |
| Of Iron and Zinc, Precipitation of. (P) Boulé. From Warzee. (xiii, 1894).....                                                                           | 1196     |
| Of Isomeric Oxycyanic Acids, Products of Dry Distillation of. (Goldschmidt and Herzog.) (i, 1882).....                                                  | 220      |
| Of Mercury and the Halogens, Acid. (Neumann.) (viii, 1889).....                                                                                         | 815      |
| Of Paramidophenyl Carbonic Acid, Production of Acid Derivatives of Alkyl. (P) Newton. From The Farbenfabriken vormals F. Bayer and Co. (xiv, 1895)..... | 769      |
| Of Piperazine, Manufacture of. (P) Wilcox. From The Farbenfabriken vormals F. Bayer and Co. (xii, 1893).....                                            | 463      |

| (Schreib.) (v, 1886).....                                                                                    | 533  |
| Production of Ammonia, and Apparatus therefor. (P) Capper. From Pick. (vi, 1887).....                        | 368  |
| Production of, and Apparatus therefor. (P) Thompson. (vii, 1888).....                                        | 626  |
| Production of Bicarbonate of:                                                                                |      |
| (P) Babbutt. (ii, 1883).....                                                                                 | 41   |
| (Carey, Gaskell, and Hurter.) (i, 1882).....                                                                 | 280  |
| (P) Clark. From La Société Anonyme des Produits Chimiques de l'Est. (iii, 1884).....                         | 484  |
| (P) Claus, Sulman, and Berrez. (vii, 1888).....                                                              | 435  |
| (P) Gaskell and Hurter. (ii, 1883).....                                                                      | 177  |
| (P) Potter and Higgin. (ii, 1883).....                                                                       | 415  |
| (P) Société Anonyme des Produits Chimiques du Sud-Ouest. (i, 1882).....                                      | 409  |
| Production of Carbonate of:                                                                                  |      |
| (P) Claus. (vi, 1887).....                                                                                   | 439  |
| (P) Parrell and Simpson. (v, 1886).....                                                                      | 668  |
| (P) Schloesing. (v, 1886).....                                                                               | 166  |
| (P) Wieg. (ii, 1883).....                                                                                    | 246  |
| Prod. of Carbonate of, Caustic, and Hydrochloric Acid or Chlorine. (P) Clark. From Daguin. (viii, 1889)..... | 193  |
| Production of Chlorate of. (P) Bottomley and Molesworth. (i, 1882).....                                      | 67   |
| Production of from Potassium Salts. (P) Wise. From The Chemische Fabrik Buckau. (x, 1891).....               | 767  |
| Production of Mono- and Bicarbonate of. (P) Wood. (vii, 1888).....                                           | 438  |
| Production of the World. (Weldon.) (ii, 1883).....                                                           | 2    |
| Production or Treatment of Bicarbonate of. (P) Wise. From Solvay and Co. (xiv, 1895).....                    | 750  |
| Purification of Bicarbonate of. (P) Wood. (vii, 1888).....                                                   | 629  |
| Purification of Carbonate of. (P) Mathieson and Hawliczek. (vi, 1887).....                                   | 290  |
| -Raffinose. (Beythien and Tollens.) (ix, 1890).....                                                          | 310  |
| Recovering from Waste Liquors of Pulp Digesters. (P) Mason and Warren. (ix, 1890).....                       | 408  |
| Recovering from Waste Lyes, and Apparatus therefor. (P) Dawson. (vi, 1887).....                              | 459  |
| Recovery of. (P) Stormer. (i, 1882).....                                                                     | 503  |
| Recovery of, from Slags. (P) "The Alkaline Reduction Syndicate" and Cunningham. (ix, 1890).....              | 519  |
| Recovery of, in Manufacture of Wood Pulp. (P) Stromer. (ii, 1883).....                                       | 295  |
| Residue, Manufacture of Sodium Sulphide from. (P) Verein Chemische Fabrik. (ii, 1883).....                   | 280  |
| Russian. (T.R.)..... (viii, 1889), 1021; (xi, 1892), 649                                                     |      |
| Sulphate of, and Salol in France. (T.R.) (xiv, 1895).....                                                    | 889  |
| Salt, Naphthyl-Sulphate. (Stebbins.) (i, 1882).....                                                          | 182  |
| Silicate of, Preparation of. (Seheuer-Kestner.) (xi, 1892).....                                              | 748  |
| Solution, Action of Alcoholic, on Albumin, &c. (Fahrion.) (xiv, 1895).....                                   | 1072 |
| Solution, Action of Alcoholic, on Gelatin and Egg Albumin. (Paal and Schilling.) (xiv, 1895).....            | 1072 |
| Solution, Filter for Caustic. (P) Thompson. From Solvay. (v, 1886).....                                      | 424  |
| Test, The Lancashire. (Tate.) (iii, 1884).....                                                               | 63   |
| Titration of. (v, 1886).....                                                                                 | 698  |
| Treating Water by Carbonate of. (MacNab and Beckett.) (v, 1886).....                                         | 267  |
| Treatment of Caustic Salts from Manufacture of Caustic. (P) Brock and others. (xiv, 1895).....               | 157  |
| Treatment of Hard Water containing. (Langer.) (xi, 1892).....                                                | 543  |
| Utilising Acid Sulphates of:                                                                                 |      |
| (P) Chatfield. (xii, 1894).....                                                                              | 735  |
| (P) Thompson. From Wolf. (vii, 1888).....                                                                    | 640  |
| -Waste, Action of Carbon-Dioxide on. (Kemp.) (iv, 1885).....                                                 | 144  |
| -Waste, Analyses, &c. of. (i, 1882).....                                                                     | 266  |
| -Waste, Determination of Alkali in. (Lunge.) (i, 1882).....                                                  | 92   |
| -Waste, Recovery of Sulphur from:                                                                            |      |
| (P) Grouven. (iv, 1885).....                                                                                 | 209  |
| (P) Rawes. (iii, 1884).....                                                                                  | 483  |
| -Waste, Treatment of. (P) Ellerhausen. (xi, 1892).....                                                       | 433  |
| -Waste, Utilisation of Ammonia. (x, 1891).....                                                               | 766  |
| -Water, Adulteration of. (xi, 1892).....                                                                     | 172  |
| Works Residues, Treatment of. (P) Miller and Opl. (iii, 1884).....                                           | 373  |
| Sodalite, Formation of. (Friedel.) (ix, 1890).....                                                           | 807  |
| Sodio-Calcium Carbonates. (Reidemeister.) (iii, 1884).....                                                   | 630  |
| Sodium. (Rosenfeld.) (x, 1891).....                                                                          | 863  |
| Acetate, Analysis of Crude. (Neumann.) (vii, 1888).....                                                      | 645  |
| Acetate, Reactions of. (Collischoun.) (xii, 1893).....                                                       | 467  |
| Acetate, Specific Gravity of. (Gerlach.) (v, 1886).....                                                      | 601  |
| Action of, on Camphor:                                                                                       |      |
| (Brühl.) (x, 1891).....                                                                                      | 1025 |
| (Kachler and Spitzer.)..... (ii, 1883), 545; (iii, 1884), 190                                                |      |

## Sodium—cont.

PAGE

|                                                                                                                       |            |
|-----------------------------------------------------------------------------------------------------------------------|------------|
| Action of, on Tribenzylamine. (Jackson and Wing.) (v, 1886).....                                                      | 377        |
| Alcinate. (Stanford.) (v, 1886).....                                                                                  | 219        |
| Alloys of, Some well-defined. (Joannis.) (xi, 1892).....                                                              | 641        |
| Alloys with Lead, Production of. (P) Hetherington and others. (xiv, 1895).....                                        | 280        |
| Aluminate, Analysis of:                                                                                               |            |
| (Bayer.) (ix, 1890).....                                                                                              | 823        |
| (Lunge.) (ix, 1890).....                                                                                              | 766        |
| Aluminate, Determination of. (Lunge.) (ix, 1890).....                                                                 | 767        |
| Aluminate, Prep. of Carbonated. (P) Lowig. (i, 1882).....                                                             | 454        |
| Aluminates, Sulphates, and Carbonates, Manufacture of. (P) Claus. (xi, 1892).....                                     | 815        |
| Amide. (Joannis.) (x, 1891).....                                                                                      | 462        |
| And Aluminium Chloride, Manufacture of, and Apparatus. (P) Lake. From de Montgals. (v, 1886).....                     | 608, 608   |
| And Aluminium Fluoride, Manufacture of. (P) Groth. From Grätz. (iv, 1885).....                                        | 744        |
| And Antimony Double Fluoride. (Kopp and Bräune.) (vii, 1888).....                                                     | 566        |
| And Bisulphate, Hypsulphite of, as Test for Potassium. (Pauy.) (vi, 1887).....                                        | 562        |
| And Chlorine Amalgam, Production of. (P) Greenwood. (xii, 1893).....                                                  | 325, 1042  |
| And Iron Double Sulphide, Recovery of Various Matters from. (P) Lunge and Dewar. (xi, 1892).....                      | 433        |
| And Lead, Alloys of. (Greene and Wahl.) (x, 1891).....                                                                | 142        |
| And Lead, Electrolytic Production of Alloy of. (P) Vautin. (xiii, 1894).....                                          | 744        |
| And other Alkali Metals, Manufacture of, and Apparatus therefor. (P) Lake. From Netto. (viii, 1888).....              | 122        |
| And Potassium, Apparatus for Manufacture of. (P) Forster. (viii, 1889).....                                           | 712        |
| And Potassium Chloride, Analysis of a Mixture of. (Schütt.) (vii, 1888).....                                          | 770        |
| And Potassium Chloride, Simultaneous Solubility of. (Etard.) (ix, 1890).....                                          | 290        |
| And Potassium Chlorides, Apparatus for Electric Decomposition of Solutions of. (P) Richardson. (xii, 1893).....       | 933        |
| And Potassium, Double Sulphite of. (Hartog.) (viii, 1889).....                                                        | 882        |
| And Potassium, Manufacture of:                                                                                        |            |
| (P) Forster. (viii, 1889).....                                                                                        | 548        |
| (P) Jarvis. (viii, 1889).....                                                                                         | 200        |
| (P) Wallis. (viii, 1889).....                                                                                         | 801        |
| (P) White. (viii, 1889).....                                                                                          | 801        |
| And Potassium Nitrates, Report on. (ix, 1890).....                                                                    | 1036       |
| And Potassium, Production of Metallic. (P) Vautin. (xiv, 1895).....                                                   | 584        |
| And Potassium Sulphides, Treatment of, to obtain H <sub>2</sub> S. (P) Chance. (viii, 1889).....                      | 118        |
| Anisate. (viii, 1889).....                                                                                            | 566        |
| -Antimony Fluoride, Analysis of. (Stein.) (vii, 1888).....                                                            | 133        |
| Arsenate, Manufacture of. (P) Blythe. (iii, 1884).....                                                                | 173        |
| Biborate, Manufacture of. (P) Ascough. (x, 1891). 1006; (xiii, 1894), 1197                                            |            |
| Bicarbonate and Carbonate, Manufacture of and Apparatus therefor. (P) Burns. (vi, 1887).....                          | 729        |
| Bicarbonate, Apparatus for Conversion of, into Carbonate. (P) La Société Marcheville Deguin and Co. (xiii, 1894)..... | 518        |
| Bicarbonate, App. for Drying. (P) Jarmay. (xiv, 1895).....                                                            | 36         |
| Bicarbonate, Apparatus for Manufacture of:                                                                            |            |
| (P) Capper. From Pick. (v, 1886).....                                                                                 | 429        |
| (P) Vivian and Bell. (x, 1891).....                                                                                   | 640        |
| Bicarbonate, Calcination of. (P) Solvay. (i, 1882).....                                                               | 26         |
| Bicarbonate in Milk, Estimation of. (Pade.) (viii, 1889).....                                                         | 1013       |
| Bicarbonate of America. (T.R.) (vi, 1887).....                                                                        | 368        |
| Bicarbonate, Preparation of, in United States. (Martyn.) (iv, 1885).....                                              | 28         |
| Bicarbonate, Production and Separation of. (P) Watts and Richards. (vi, 1887).....                                    | 517        |
| Bicarbonate, Production of:                                                                                           |            |
| (P) Brown. (iv, 1885).....                                                                                            | 117        |
| (P) Clancy. (xiv, 1895).....                                                                                          | 482        |
| (P) Gossage and Williamson. (xii, 1893).....                                                                          | 1030, 1030 |
| (P) Imray. From Rotter. (xii, 1893).....                                                                              | 156        |
| (P) Mond and Jarmay. (iv, 1885).....                                                                                  | 282        |
| (P) Wigg. (vii, 1888).....                                                                                            | 502        |
| Bicarbonate, Production of, and Apparatus therefor:                                                                   |            |
| (P) Leith. (x, 1891).....                                                                                             | 463        |
| (P) Solvay. (viii, 1889).....                                                                                         | 45         |
| Bicarbonate, Prod. of Refined. (P) Jarmay. (xiv, 1895).....                                                           | 36         |
| Bicarbonate, Purification of. (P) Gaskell. (iv, 1885).....                                                            | 594        |
| Bicarbonate, Solubility of. (Reich.) (xi, 1892).....                                                                  | 346        |
| Bicarbonate, Testing. (vii, 1888).....                                                                                | 136        |
| Bicarbonate, Treatment of. (P) Bell. (xiii, 1894).....                                                                | 735        |
| Bichromate for Photo Printing. (Husnik.) (ix, 1890).....                                                              | 103        |
| Bichromate of Commerce. (Kissling.) (x, 1891).....                                                                    | 461        |
| Bichromate, Production and Storage of. (P) Gorman. (iv, 1885).....                                                    | 211        |
| Bichromate, Production of:                                                                                            |            |
| (P) Carlile and Park. (iv, 1885).....                                                                                 | 117        |
| (P) Chrystal. (iv, 1885).....                                                                                         | 282        |

| Apparatus for Separating, from Fluids:                                                               |               |
| (P) Birch. (xii, 1893).....                                                                          | 460           |
| (P) Danchel. (ix, 1890).....                                                                         | 377           |
| (P) Muirhead. (vii, 1889).....                                                                       | 208           |
| (P) O'Brien. (xiv, 1895).....                                                                        | 495           |
| (P) Sawrey and Collet. (vii, 1888).....                                                              | 834           |
| (P) Stewart. (xiv, 1895).....                                                                        | 15            |
| Apparatus for Separating, from Liquids and Gases. (P) Jones. (x, 1891).....                          | 240           |
| Apparatus for Separating Liquids from:                                                               |               |
| (P) Deacon and Driffeld. (x, 1891).....                                                              | 239           |
| (P) Welsh and Godman. (xii, 1893).....                                                               | 134           |
| Apparatus for Treating, by Gases:                                                                    |               |
| (P) Melville. (xii, 1893).....                                                                       | 1013          |
| (P) Mond. (vii, 1888).....                                                                           | 833           |
| Concentration and Separation of, Process and Apparatus for. (P) Mays. (xii, 1893).....               | 435           |
| Method and Apparatus for Separating, from Liquids. (P) Hucks. (viii, 1889).....                      | 694           |
| Of Different Specific Gravities, Apparatus for Separating. (P) Sharp. (ii, 1883).....                | 369           |
| Or Fluids Dissolved in Alcohol, &c., Apparatus for Separating. (P) Weitenkamp. (xii, 1893).....      | 1015          |
| Or Liquids, Machines for Mixing. (P) Smith. (viii, 1889).....                                        | 379           |
| Propagation of the Explosive Wave in. (Berthelot.) (x, 1891).....                                    | 384           |
| Separating, from Liquids:                                                                            |               |
| (P) Johnson. From Boiholdt and Glatz. (xii, 1893).....                                               | 435           |
| (P) Raleigh. (xiv, 1895).....                                                                        | 135           |
| Under Pressure, Reactions between. (Spring.) (vii, 1888).....                                        | 567           |
| Soltien and Kellner Methods of Removing Bitter Alkaloid from Lupins. (Kuhn.) (vii, 1889).....        | 555           |
| Solubility Tests of Mineral Lubricating Oil. (Holte.) (xii, 1894).....                               | 668           |
| Soluble Glass, Purification of Beet Juice and Molasses by. (P) Schott. (iii, 1884).....              | 114           |
| See also under Water-Glass and Sodium Silicate.                                                      |               |
| Solution, Abnormal, Instance of. (Parmentier.) (xi, 1892).....                                       | 780           |
| Adhesive. (P) Saunders and Kerry. (ix, 1890).....                                                    | 398           |
| Alteration of Conductivity of a. (Holland.) (xii, 1893).....                                         | 275           |
| And Pseudo-Solution. (Picton and Linder.) (xi, 1892).....                                            | 64            |
| Estimations in Alkaline. (Jannasch and Niederhofheim.) (xi, 1892).....                               | 270           |
| For Cleansing Wearing Apparel. (P) Hulme. (ii, 1883).....                                            | 346           |
| For Determining Hardness of Water. (Tiechborne.) (i, 1882).....                                      | 383           |
| For Preserving Timber, Linen, Cotton, &c. (P) McLea and Punshon. (vii, 1888).....                    | 841           |
| For Titrating Weldon Muds for Manganese Peroxide. (McKellar.) (vii, 1889).....                       | 968           |
| For Use in Dyeing Silk. (P) Truman. (xi, 1892).....                                                  | 680           |
| For Waterproofing Cloth, Felt, Paper, &c. (P) Gaugl and Mossner. (viii, 1889).....                   | 625           |
| In the Cold, Rapid Method of. (Coleman.) (x, 1894).....                                              | 231           |
| Law of. (Le Chatelier.) (iv, 1883).....                                                              | 341           |
| Of Cuprous Chloride as a Developer, Ammoniacal. (vii, 1888).....                                     | 231           |
| Separation of Matters in, by Osmose, Electrolysis, &c. (P) Marx. (viii, 1889).....                   | 288           |
| Separation of Metals in Alkaline. (Jannasch and Kammerer.) (xiv, 1895).....                          | 889           |
| Solutions, Acid and Basic Salts in very Dilute. (Berthelot.) (xi, 1892).....                         | 464           |
| Acid, Separation of Metals from. (P) Whitehead and Gelsch. (xiv, 1895).....                          | 865           |
| Action of Gelatin on Saline. (Mills and Savers.) (xiv, 1895).....                                    | 252           |
| Albuminous, Preventing Curdling of. (P) Alén. (xi, 1892).....                                        | 259           |
| Alkaline, Purification of:                                                                           |               |
| (P) Cary and others. (i, 1882).....                                                                  | 364           |
| (Deacon and Gaskell.) (i, 1882).....                                                                 | 320           |
| (P) Glover. (iii, 1884).....                                                                         | 107           |
| Alkaline, Purification of, and Production of Ammonia. (P) Carey, Gaskell, and Hurter. (i, 1882)..... | 26            |
| Alumina, Separation of Iron from. (Fahlberg.) (i, 1882).....                                         | 275           |
| Apparatus for Concentrating:                                                                         |               |
| (P) Croll. (vi, 1887).....                                                                           | 820           |
| (P) Herman. (x, 1891).....                                                                           | 239           |
| Apparatus for Distilling, &c. (P) Barbier. (xii, 1893).....                                          | 602           |
| Apparatus for Electrolysing Chloride. (P) Hermite and others. (xiv, 1895).....                       | 492, 810, 810 |
| Apparatus for Evaporating:                                                                           |               |
| (P) Chapman. (viii, 1889), 128, 128: (xii, 1893).....                                                | 510           |
| (P) Foster. (x, 1891).....                                                                           | 653           |
| (P) Fryer. (x, 1891).....                                                                            | 339           |
| (Grauer.) (vi, 1887).....                                                                            | 303           |
| (P) Hansen. (ix, 1890).....                                                                          | 1116          |
| (P) Klaufing. (v, 1886).....                                                                         | 368           |
| (P) Knoop. (vii, 1888).....                                                                          | 614           |
| (P) Laberie. (xi, 1892).....                                                                         | 1019          |
| (P) Morrell. (x, 1891).....                                                                          | 241           |
| Apparatus for Evaporating Saccharine:                                                                |               |
| (P) Chapman. (ix, 1890).....                                                                         | 401           |
| (P) Morrell and Fromherz. (xii, 1894).....                                                           | 377           |
| App. for Filtering. (P) Newlands and Allott. (viii, 1889).....                                       | 128           |
| Apparatus for Separating, from Pulverised Material. (P) Vautin. (vii, 1888).....                     | 109           |
| Aqueous, of Ammonia, at different Specific Gravities. (Gruneberg.) (viii, 1889).....                 | 390           |
| Boilers for Treating Wood, &c., with Acid. (P) Lundeborg. (viii, 1889).....                          | 304           |
| Boiling, by Electric Current. (P) Schif. (xii, 1893).....                                            | 1042          |

|                                                                                                                   | PAGE |

| Constitution of. (Küderlin.) (viii, 1889).....                                                                    | 43   |
| Containing Nickel and Iron, Treating. (P) Johnson. From Parker and Robinson. (xi, 1892).....                      | 755  |
| Containing Salts, Apparatus for Evaporating. (P) Foster. (x, 1891).....                                           | 683  |
| Containing Sulphurous Acid or its Salts. (P) McDougall. (viii, 1889).....                                         | 391  |
| Copper from Cupreous. (P) Price. (iii, 1884).....                                                                 | 524  |
| Crystallisation of Anhydrous Grape Sugar from Aqueous. (Behr.) (i, 1882).....                                     | 374  |
| Determination of Acidity of. (de la Harpe.) (iv, 1885).....                                                       | 510  |
| Dropping Flask for Standard. (Vanderpoel.) (xiii, 1894).....                                                      | 602  |
| Electric Conductivity of Saline. (Chrontschoff.) (viii, 1889).....                                                | 900  |
| Electric Decomposition of. (P) Hulin. (xiv, 1895).....                                                            | 584  |
| Electrolysis of Calcium Chloride. (Schoop.) (xiv, 1895).....                                                      | 584  |
| Electrolysis of Saline. (P) Lénard. (xiii, 1894).....                                                             | 818  |
| Electrolytical Separation of Bases of Salts from Saline. (P) Vautin. (xiii, 1894).....                            | 256  |
| Escape of Dissolved Bodies on the Evaporation of. (Marguerite-Delacharlouney.) (vi, 1887).....                    | 306  |
| Evaporating Saccharine and other. (P) Thompson. From Gillan. (ii, 1883).....                                      | 388  |
| Evaporating Saline. (P) Bell. (xiii, 1894).....                                                                   | 734  |
| Evaporation of. (P) Bell. (xiii, 1894).....                                                                       | 1014 |
| Extraction of Bases from Fermented. (Moren.) (vii, 1888).....                                                     | 336  |
| For Coating Metals with Lead. (P) Clark. From Horgan. (x, 1891).....                                              | 704  |
| For Colouring Metals. (Pensky.) (vii, 1888).....                                                                  | 753  |
| For Toning Photographs. (P) Williams. (xii, 1893).....                                                            | 948  |
| For Use as Antiseptics, &c., Production of. (P) Kingzett. (vii, 1888).....                                        | 43   |
| For Waterproofing and Airproofing. (P) Eckstein. (xii, 1893).....                                                 | 840  |
| Glycerin in Aqueous, Estim. of. (Filsinger.) (vii, 1888).....                                                     | 350  |
| Heat Conductivity of. (Jaeger.) (x, 1891).....                                                                    | 488  |
| Hydrostatic App. for Treating. (P) Spence. (xiii, 1894).....                                                      | 713  |
| Inverting Action of French Official Chloride of Iron. (Herissey.) (xiv, 1895).....                                | 1053 |
| Means for Transferring Wash. (Voorhees.) (xii, 1893).....                                                         | 623  |
| Measurement of Concentration of. (Ellinger.) (x, 1891).....                                                       | 949  |
| Obtaining Metals from their. (P) Sulman. (xiv, 1895).....                                                         | 870  |
| Of Alkaloids, Vegetable Organisms in. (Soubiran.) (vi, 1887).....                                                 | 381  |
| Of Ammonia, Specific Gravity of. (Lunge and Wiernik.) (viii, 1889).....                                           | 541  |
| Of Arsenic, Treatment of. (P) McDougall. (xii, 1893).....                                                         | 156  |
| Of Barium or Strontium Compounds, Treatment of. (P) Gibb. (vii, 1888).....                                        | 675  |
| Of Neutral Substances in Benzene, Freezing Point of. (Raoult.) (i, 1882).....                                     | 495  |
| Of Phenols, Aqueous. (P) Ichters. (xiii, 1894).....                                                               | 900  |
| Of Salts, Apparatus for keeping, at Constant Strength. (Foerster.) (ix, 1890).....                                | 765  |
| Of Sweet Carbohydrates. (P) Sommer. (xiii, 1894).....                                                             | 1071 |
| Precipitating Oxide of Tin from. (P) Berton. (xii, 1893).....                                                     | 762  |
| Precipitation of Tin from Acid. (P) Berton. (xii, 1893).....                                                      | 762  |
| Preservation of Standard, by Salicylic Acid. (Borntrager.) (vii, 1888).....                                       | 771  |
| Rate of Loss in Citric Acid. (Watts.) (v, 1886).....                                                              | 217  |
| Recovering Salts from. (P) Huntley. (xiv, 1895).....                                                              | 364  |
| Recovery of Chronic Acid from Battery. (P) Fitzgerald. (vi, 1887).....                                            | 515  |
| Recovery of Gold and Silver from. (P) Kendall. (xiv, 1895).....                                                   | 871  |
| Removal of Salts of Calcium, Magnesium, &c. from Aqueous. (P) Doremus. (viii, 1889).....                          | 884  |
| Saccharine, Boiled to Granular State, Treatment of. (P) Mewburn. From Maschinenfab. Grevenbroich. (xi, 1892)..... | 626  |
| Saccharine, Crystallisation of. (P) Mewburn. From The Maschinenfabrik Grevenbroich. (xi, 1892).....               | 543  |
| Saccharine, Defecating. (P) Scheibler. (ix, 1882).....                                                            | 513  |
| Saccharine, Filtering. (P) Alexander. From Casamajor. (ii, 1883).....                                             | 482  |
| Saccharine, Purifying. (P) Lach and Benies. (xiii, 1891).....                                                     | 824  |
| Saline, Compressibility of. (Gillbanc.) (xi, 1892).....                                                           | 780  |
| Saline, Removing Iron from. (Fahlberg.) (i, 1882).....                                                            | 275  |
| Saline, Separation of Arsenic from. (P) Glaser. (iii, 1884).....                                                  | 519  |
| Saturated. (Parmentier.) (xi, 1892).....                                                                          | 780  |
| Specific Gravities of. (Gerlach.) (v, 1886).....                                                                  | 521  |
| Specific Heats of. (Mathias.) (vii, 1888).....                                                                    | 768  |
| Stability of Antiseptic Sublimates. (Meyer.) (vii, 1888).....                                                     | 131  |
| Stability of Permanganate. (Oddy and Cohen.) (ix, 1890).....                                                      | 17   |
| Standard. (Buchanan.) (xii, 1894).....                                                                            | 1093 |
| Standardising Chloride. (Perman and John.) (xiv, 1895).....                                                       | 770  |
| Stannous Chloride, Decomposition of. (Donath.) (vi, 1887).....                                                    | 456  |
| Sugar, Classification of. (v, 1886).....                                                                          | 169  |
| Sugar, Purif. of, by Electrolysis. (Hersch.) (xiv, 1895).....                                                     | 876  |
| Sugar, Refining. (P) Scheibler. (ii, 1883).....                                                                   | 136  |
| Temperature of Steam from Salt. (Sakurai.) (xi, 1892).....                                                        | 551  |
| Treating, for Producing Dyes. (P) Frost. (ix, 1890).....                                                          | 167  |

| Coating, with Copper. (P) Taylor. (iv, 1885).....                                               | 503     |
| Coating, with Metallic Alloys. (P) Fenby and Moore. (xiii, 1894).....                           | 400     |
| Coating, with Vitreous Enamels. (P) Biddell. (iv, 1885).....                                    | 746     |
| Coercitive Force of. (Clemendot.) (i, 1882).....                                                | 410     |
| Composition for Coating. (P) Elliott. (xiii, 1894).....                                         | 962     |
| Compounds for Converting Low Grade, into High Grade. (P) Bates. (xii, 1893).....                | 523     |
| Compressed Carbonised, Manufacture of. (P) Imray. From Carey. (xiv, 1895).....                  | 755     |
| Conditions under which Carbon exists in. (Arnold and Read.) (xiii, 1894).....                   | 740     |
| Constants and Co-efficients of Elasticity of Nickel. (Mercedier.) (xi, 1892).....               | 166     |
| Conversion of Crude-iron into. (P) Bookwalter. From Robert. (vii, 1888).....                    | 504     |
| Conversion or Purification of. (P) Boulton. From Kone-man, Singer, and Hatch. (xiii, 1894)..... | 42      |
| Converter Linings and Bottoms. (P) Tucker. (vi, 1887).....                                      | 43, 512 |
| Converting Cast-Iron into: (P) Bond and Whiteley. (ii, 1883).....                               | 330     |
| (P) Huffy and Caldwell. (xiv, 1895).....                                                        | 581     |
| (Lebedeff.) (xi, 1892).....                                                                     | 245     |
| Converting Iron into: (P) Hodge. (x, 1891).....                                                 | 645     |
| (P) Lake. From Hardmeyer and others. (vii, 1888).....                                           | 634     |
| Converting Iron Plates into. (P) Zohrab. (xiv, 1895).....                                       | 161     |
| Copper in, Estimation of. (Reinhardt.) (viii, 1889).....                                        | 572     |
| Coppering with Alkaline-organic Solutions of Copper. (Weil.) (i, 1882).....                     | 234     |
| Crucible, Manufacture of. (Müller.)..... (iv, 1885), 676; (vi, 1887), 293                       |         |
| Crystallised Compounds in Cement. (Bekrens and Van Lingé.) (xiv, 1895).....                     | 274     |
| Crystals contained in a Bar of Swedish. (Stoltzer.) (ii, 1883).....                             | 262     |
| Dephosphorisation of, in Germany. (Braun.) (i, 1882).....                                       | 71      |
| Desulphurising. (Saniter.) (xii, 1893).....                                                     | 692     |
| Direct from Ore, Production of. (T.R.) (vi, 1887).....                                          | 755     |
| Direct Preparation of. (P) Justice. (i, 1882).....                                              | 192     |
| Distinguishing Iron from. (Sévoz.) (iv, 1885).....                                              | 138     |
| Effect of Arsenic on. (Stead.) (xiv, 1895).....                                                 | 579     |
| Effect of Rolling and Wire Drawing upon Mild. (Allen.) (viii, 1889).....                        | 51      |
| Elasticity of, Variation in. (iv, 1885).....                                                    | 600     |
| Electro Fusion of. (P) Thwaite. (xiii, 1894).....                                               | 528     |
| Elimination of Sulphur from Molten. (P) Phillips. (xii, 1894).....                              | 42      |
| Elimination of Sulphur or Phosphorus from Molten. (P) Phillips. (xii, 1893).....                | 932     |
| Emmerton's Method of Determination of Phosphorus in. (Babbitt.) (xii, 1893).....                | 627     |
| Extracting, from Ores. (P) Lebedeff. (x, 1891).....                                             | 838     |
| For Corsets, Substitute for. (P) Royle. (iv, 1885).....                                         | 537     |
| For Rails, Experiments on. (Gruener.) (i, 1882).....                                            | 111     |
| For Rails, Quality of. (Gruener.) (i, 1882).....                                                | 151     |
| Founding. (P) McRoberts. (xiii, 1894).....                                                      | 645     |
| From Inferior Wrought Iron. (P) Sheehan. (iii, 1884).....                                       | 180     |
| From Oxidised Pyrites, Manufacture of. (P) Whiteman. From Martin. (i, 1882).....                | 192     |
| Furnaces, Basic Linings for Open Hearth. (P) Batilo. (iv, 1885).....                            | 214     |
| Furnaces for Making Malleable. (P) Burch and Allen. (iv, 1885).....                             | 213     |

## Steel—cont.

PAGE

|                                                                                                          |      |
|----------------------------------------------------------------------------------------------------------|------|
| Fusion of Mild. (P) La Compagnie Anonyme des Forges, &c. (xii, 1893).....                                | 815  |
| Galvanising:                                                                                             |      |
| (P) Greenway. (xii, 1895).....                                                                           | 359  |
| (P) Saunders. (ix, 1890).....                                                                            | 195  |
| Gases in. (Müller.) (iv, 1885).....                                                                      | 676  |
| Hadfield's Manganese. (Le Chatelier.) (ix, 1890).....                                                    | 518  |
| Hardening:                                                                                               |      |
| (P) Bramwell. (ix, 1890).....                                                                            | 742  |
| (P) Charpy. (xlv, 1895).....                                                                             | 972  |
| (How.) (xiv, 1895).....                                                                                  | 869  |
| (P) Lake. From Childs. (iii, 1884).....                                                                  | 641  |
| (Metcalf and Langley.) (xii, 1893).....                                                                  | 522  |
| Hardening and Tempering:                                                                                 |      |
| (Roberts-Austen.) (ix, 1890).....                                                                        | 75   |
| (P) Wallis. (viii, 1889).....                                                                            | 987  |
| Hardening, Influence of, on its Electrical Resistance. (Le Chatelier.) (x, 1891).....                    | 478  |
| Impurities in Nickel. (Sperry.) (xv, 1895).....                                                          | 387  |
| In the United States in 1888. (T.R.) (vii, 1888).....                                                    | 601  |
| Influence of Copper and Sulphur in Rendering, "Red Short." (Wasum.) (i, 1882).....                       | 323  |
| Influence of Copper, on Tensile Strength of. (Ball and Wintham.) (viii, 1889).....                       | 546  |
| Influence of Pickling on. (xv, 1895).....                                                                | 870  |
| Influence of Pressure on Hardness of. (i, 1882).....                                                     | 323  |
| Influence of Silicon on. (Turner.) (vi, 1887).....                                                       | 293  |
| Influence of Sulphur and Copper upon Rolling Properties of. (Wasum.) (i, 1882).....                      | 323  |
| Influence of Temperature on Properties of. (Le Chatelier.) (viii, 1889).....                             | 710  |
| Influence of Temperature of Tempering on Quality of. (Jarolimék.) (iv, 1885).....                        | 222  |
| Ingot, Casting in Sweden. (xii, 1893).....                                                               | 931  |
| -Making in Austria-Hungary. (Brieson.) (xi, 1892).....                                                   | 609  |
| -Making Processes, Experiments in. (Brand.) (iv, 1885).....                                              | 404  |
| Malleable, Producing, from the Ore, and Apparatus therefor. (P) Thompson. From Husegavel. (v, 1886)..... | 168  |
| Manganese:                                                                                               |      |
| (Howe.) (xii, 1893).....                                                                                 | 1037 |
| (Le Chatelier.) (xii, 1891).....                                                                         | 1198 |
| Manganese and Phosphorus in, Determination of. (Troilius.) (iii, 1884), 523; (iv, 1885).....             | 137  |
| Manganese in. (Babbitt.) (vi, 1887).....                                                                 | 383  |
| Manganese in, Rapid Determination of. (Weissmann.) (vii, 1885).....                                      | 235  |
| Manganese, Manufacture of. (P) Hadfield. (xiii, 1891).....                                               | 711  |
| Manufacture of, and Apparatus therefor:                                                                  |      |
| (P) Thompson. From Bertrand and Thiel. (xiii, 1891).....                                                 | 816  |
| (P) White. (xii, 1893).....                                                                              | 451  |
| (P) Williamson. (iv, 1885).....                                                                          | 122  |
| Manufacture of, and Production of Phosphoric Slag. (P) Darby. (viii, 1889).....                          | 549  |
| Manuf. of, in the Open Hearth. (Lencauhez.) (xiii, 1891).....                                            | 953  |
| Manufacture of, Mixture for Use in. (P) Fidge and Wood. (xii, 1893).....                                 | 47   |
| Manufacture of Open-Hearth. (P) Penrose and Hackney. (vi, 1887).....                                     | 294  |
| Manufacture of Open-Hearth, in Sweden. (Odel-tjerna.) (xiii, 1891).....                                  | 1065 |
| Manufacturing and Testing, Methods of. (Kupelwieser.) (iii, 1881).....                                   | 31   |
| Materials for Converting Iron or Low Grade into High Grade Steel. (P) Bates. (ix, 1890).....             | 811  |
| Metallic Flux for Refining. (P) Sentinella. (xii, 1893).....                                             | 273  |
| Mild, Manufacture of. (P) Prosser. (ii, 1883).....                                                       | 416  |
| Moulds, Powder for Coating. (P) Stephens. (x, 1891).....                                                 | 935  |
| Nickel. (ix, 1890).....                                                                                  | 1039 |
| Nickel, and its Advantages over Ordinary Steel. (Wiggin.) (xiv, 1895).....                               | 868  |
| Nickel in, Determination of. (Westesson.) (xii, 1891).....                                               | 666  |
| Nickel in, Estimation of. (xii, 1893).....                                                               | 377  |
| Nickel in Nickel, Determination of:                                                                      |      |
| (Campbell.) (xiii, 1891).....                                                                            | 661  |
| (Campbell and Andrews.) (xiv, 1895).....                                                                 | 598  |
| Nickel, Manufacture of. (P) Garnier. (x, 1891).....                                                      | 1010 |
| Nickel, Physical Properties of. (Hopkinson.) (ix, 1890).....                                             | 624  |
| Nickel, Process, The Leche. (xi, 1892).....                                                              | 439  |
| Or Homogeneous Cast Iron, Production of. (P) Lencauhez. (xiv, 1895).....                                 | 582  |

| Influence of Inversion upon Fermentation of Cane. (Bauer.) (i, 1882).....                                    | 330      |
| Influence of Invert, on Formation of Molasses. (Prinsen-Geerlings.) (xiv, 1895).....                         | 667      |
| Influence of Lead Acetate on Cupric Reducing Power of Invert. (Borntrager.) (xiii, 1894).....                | 1230     |
| Influence of Lead Acetate on Estimation of Invert. (Borntrager.) (xiv, 1895).....                            | 896      |
| Influence of, on Cements. (Stammer.) (viii, 1889).....                                                       | 545      |
| Influence of Percentage of Fat in Beetroot Seed on Richness of Beets in. (Doerstling.) (xiii, 1894).....     | 410      |
| Influence of Volume of Lead Acetate Precipitate in Titration of. (Borntrager.) (xiii, 1894).....             | 1230     |
| Inversion of, by Glycerin. (Bordt.) (xiii, 1894).....                                                        | 1211     |
| Inversion of Cane, by Invertase. (Thompson.) (ix, 1890).....                                                 | 309      |
| Inversion of Cane, in Acid Syrups. (Hicrissey.) (xiv, 1895).....                                             | 606      |
| Invert. (Jungfleisch and Grimbirt.) (viii, 1889).....                                                        | 295      |
| Invert, Detection of. (vii, 1888).....                                                                       | 527      |
| Invert, Detection of, by Methylene Blue. (vii, 1888).....                                                    | 591      |
| Invert, Determination of. (v, 1886).....                                                                     | 547      |
| (Weichmann.) (x, 1891).....                                                                                  | 955      |
| Invert, Determination of Amount of Inversion in. (Lovibond.) (vii, 1888).....                                | 831      |
| Invert, Estimation of. (viii, 1889).....                                                                     | 1014     |
| (Preuss.) (vii, 1888).....                                                                                   | 76       |
| (Striegler.) (xi, 1892).....                                                                                 | 1038     |
| Invert, Estimation of, in Factory Products. (viii, 1889).....                                                | 1014     |
| Invert, Estimation of Small Quantities of. (Baumann.) (xii, 1893).....                                       | 457      |
| Invert, in Cane Juices. (Schweitzer.) (ix, 1890).....                                                        | 878      |
| Isolation of Crystallised Cane, from Maize. (Washburn and Tollens.) (ix, 1890).....                          | 748      |
| Juice, Apparatus for Concentrating:                                                                          |          |
| (P) Deacon. From Maxwell. (xi, 1892).....                                                                    | 830      |
| (P) Raeymackers. (ix, 1890).....                                                                             | 878      |
| Juice, Apparatus for Cooling. (P) Wise. From D'Abbadie de Barrau. (xii, 1893).....                           | 458      |
| Juice, Apparatus for Treating. (P) Pitt. From Tracey. (ix, 1890).....                                        | 878      |
| Juice, Centrifugal Machines for Extracting. (P) Mewburn. (xi, 1892).....                                     | 931      |
| Juice Clarifiers. (P) Fletcher. (iii, 1884).....                                                             | 645      |
| Juice, Continuous Saturation of. (Reboux.) (xiii, 1894).....                                                 | 749      |
| Juice, Decolorisation and Purification of. (Englert and Becker.) (vi, 1887).....                             | 47       |
| Juice, Defecation of Cane. (P) Leigh. From Fry. (x, 1891).....                                               | 781      |
| Juice, Determination of the Density of. (ix, 1890).....                                                      | 657      |
| Juice, Extracting, from Canes, Roots, &c. (P) Berry. (xiv, 1895).....                                        | 762      |
| Juice, Extraction of Cane. (P) Boomer. (ii, 1883).....                                                       | 290      |
| Juice, Filtration of Cane, during Evaporation. (Philippe.) (xiv, 1895).....                                  | 375      |
| Juice, Filtration of Diffusion, after Heating. (xiii, 1894).....                                             | 749      |
| Juice, Filtration of Saturated. (Bouvier.) (xii, 1893).....                                                  | 776      |
| Juice, Multiple Effect Evaporating Apparatus for. (P) Maxwell. (ix, 1890).....                               | 794      |
| Juice, Precipitates obtained in Evaporating. (Storey.) (xii, 1894).....                                      | 750      |
| Juice, Purification of Cane, with Baryta. (Du Beaufret.) (xiv, 1895).....                                    | 47       |
| Juice, Purification of Diffusion. (Liedke.) (xiii, 1894).....                                                | 749      |
| Juice, Purification of, in Triple-Effect Apparatus. (Mittlemann.) (xiii, 1894).....                          | 166      |
| Juice, Refining. (P) Schneller and Wisse. (xi, 1892).....                                                    | 830      |
| Juice, Treatment of Cane. (P) Leigh. From Canbray. (xii, 1894).....                                          | 1211     |
| Juice, Treatment of, with Baryta and Sulphurous Acid. (Dupont.) (xiv, 1895).....                             | 497      |
| Juices, Apparatus for Defecating and Evaporating. (P) Corders. (x, 1891).....                                | 843      |
| Juices, Filtering Substance for. (P) Thompson. (vii, 1888).....                                              | 580      |
| Juices, Filters for. (P) Abel. From Perret. (iii, 1884).....                                                 | 375      |

| Refining Coloured Raw. (P) Steffen. (iii, 1884).....                                                 | 576  |
| Refining, Mode of Using Char in. (Newlands.) (vii, 1888).....                                        | 419  |
| Refining of, and Treatment of Syrup obtained. (P) Bander. (viii, 1889).....                          | 128  |
| Refining Precipitate, Chemical Composition of a. (Farsky.) (v, 1886).....                            | 542  |
| Refining, Process and Apparatus for. (P) Steffen and Langen. (vii, 1888).....                        | 658  |
| Removal of, from Molasses by Lime. (Lefranc.) (vii, 1888).....                                       | 334  |
| Removing Sulphate of Lime from Solutions of. (P) (Kunheim and Co.) (i, 1882).....                    | 30   |
| "Rendement" Employed in Purchase of Raw. (Broz.) (xiv, 1895).....                                    | 375  |
| Researches on. (Kent and Tollens.) (iv, 1885).....                                                   | 412  |
| Rotatory Power of Invert:                                                                            |      |
| (Oct.) (x, 1891).....                                                                                | 858  |
| (Tollens.) (x, 1891).....                                                                            | 859  |
| Salts in Raw. Estimation of. (viii, 1889).....                                                       | 994  |
| Scum, Utilisation of. (P) Wass. (v, 1886).....                                                       | 453  |
| Separation of, from Molasses. (P) Scheibler. (ii, 1883).....                                         | 291  |
| Separation of Raffinose from Cane. (ix, 1890).....                                                   | 90   |
| Solubility of Cane, in Alcohol and Water. (Schreiffeld.) (xiv, 1895).....                            | 375  |
| Solubility of, in Water. (Herzfeld.) (xi, 1892).....                                                 | 542  |
| Solution Evaporation Tables. (Spencer.) (ix, 1890).....                                              | 638  |
| Solution, Inversion of. (Besemfelder.) (xiv, 1895).....                                              | 51   |
| Solution, Solubility of Salts of the Heavy Metals in. (Stern and Frankel.) (xii, 1893).....          | 1067 |
| Solutions, Apparatus for Concentrating. (P) Thompson. From Morrell and Stringfellow. (xi, 1892)..... | 895  |
| Solutions, Apparatus for Evaporating. (P) Chapman. (ix, 1890).....                                   | 401  |
| Solutions, Behaviour of Cupric Hydrate in. (Habermann and Konig.) (i, 1882).....                     | 462  |
| Solutions, Behaviour of, with Acetone. (Krug and McElroy.) (xii, 1893).....                          | 68   |
| Solutions, Clarification of. (v, 1886).....                                                          | 169  |
| Solutions, Clarifying and Saturating. (P) Heffter. (vii, 1888).....                                  | 146  |
| Solutions, Evaporating. (P) Morrell. (i, 1882).....                                                  | 195  |
| Solutions, Extraction of Raffinose, &c. from. (P) Abel. From Pfeifer and Langen. (vii, 1888).....    | 41   |
| Solutions, Purification of, by Electrolysis. (Bersch.) (xiv, 1895).....                              | 876  |
| Solutions, Purification of, by Polysulphurisation. (vii, 1888).....                                  | 349  |
| Solutions, Purifying. (P) Steffen. (xiii, 1894).....                                                 | 1211 |
| Solutions, Purifying and Decolorising:                                                               |      |
| (P) Steffen. (xiii, 1894).....                                                                       | 966  |
| (Steffen and Druker.) (xiii, 1894).....                                                              | 823  |
| Solutions, Temperature and Density of Freezing Point of Cane. (de Coppet.) (xiv, 1895).....          | 375  |
| Solutions, Treatment of. (P) Lorrain. (viii, 1889).....                                              | 810  |
| Solutions, Use of Charcoal in Decolorising. (Bauer.) (vii, 1888).....                                | 636  |
| Sorbitol in Products of Manufacture of. (von Lippmann.) (xii, 1893).....                             | 54   |
| Sources of Melitose in Manufacture of. (von Lippmann.) (v, 1886).....                                | 169  |
| Soxhlet's Process of Refining. (von Lippmann.) (xii, 1893).....                                      | 851  |
| Specific Rotation of Invert. (Gubbe.) (iv, 1885).....                                                | 747  |
| Specific Rotatory and Cupric Reducing Power of Invert. (O'Sullivan.) (xi, 1892).....                 | 372  |
| Starch or Cane, in Honey, Detection of. (Hager.) (v, 1886).....                                      | 179  |
| Starch, Refining. (Soxhlet.) (i, 1882).....                                                          | 156  |
| Steam Pan for Boiling. (P) Fletcher. (xiv, 1895).....                                                | 736  |

## Sugar—cont.

|                                                                                                 |           |
|-------------------------------------------------------------------------------------------------|-----------|
| Sweetness of Grape. (Herzfeld.) (vi, 1887).....                                                 | 603       |
| Syndicate in Russia. (T.R.) (xiv, 1895).....                                                    | 694       |
| Synthesis of Grape. (Fischer.) (ix, 1890).....                                                  | 525       |
| Syrups, Purifying, by Fatty Acids. (Harm.) (viii, 1889).....                                    | 558       |
| Test for Invert, by Soldani's Solution. (Pareus.) (vii, 1888).....                              | 591       |
| Testing Beetroot and Cane. (xiv, 1895).....                                                     | 46        |
| Trade of Austria. (T.R.) (viii, 1889).....                                                      | 335, 1019 |
| Trade of France in 1894. (T.R.) (xiv, 1895).....                                                | 694       |
| Trade of Germany. (T.R.) (xiv, 1895).....                                                       | 903       |
| Treating Raw, and Apparatus therefor. (P) Newhall and Tucker. (v, 1886).....                    | 330       |
| Treatment of Cane, for Forming Lactic Acid. (Beythien and others.) (ix, 1890).....              | 310       |
| Treatment of, to Facilitate Washing. (P) Abel. From Pfeifer and Langen. (ix, 1890).....         | 401       |
| Untermontable Substance in Commercial Starch. (Schmitt and Cobenzl.) (iii, 1884).....           | 453       |
| Use of Baryta and Strontia for Extraction of. (Cuisinier.) (i, 1882).....                       | 461       |
| Use of Baryta in Manufacture of Cane. (Gravier.) (xiv, 1895).....                               | 48        |
| Use of Bi-sulphite of Lime in Manufacture of. (i, 1882).....                                    | 512       |
| Use of Grapes, in Brewing. (iv, 1885).....                                                      | 542       |
| Use of, in Manuf. of Fire-Clay Goods. (P) Pulin. (ix, 1890).....                                | 393       |
| Use of Poisonous Substances in Manufacturing. (Scheibler.) (vi, 1887).....                      | 828       |
| Use of Sulphurous Acid in Manufacture of Grape. (Horton.) (xiv, 1895).....                      | 497       |
| Valuing Raw. (Herzfeld.) (xi, 1892).....                                                        | 541       |
| Variety of, in India. (van Lookeren.) (xiv, 1895).....                                          | 81        |
| Washing Raw. (P) Redfern. From Weinrich. (x, 1891).....                                         | 560       |
| Water in Cane, Estimation of. (Gunning and Alberda.) (xiv, 1895).....                           | 398       |
| White Lump, from Boiled Refinery Mass. (P) Franzen. (vii, 1888).....                            | 42        |
| Wood-. (Allen and Tollens.) (x, 1891).....                                                      | 473       |
| Working up Diffusion Residues from. (P) Maerker. (iv, 1885).....                                | 232       |
| Works, Analysis of Products of. (Harperath.) (v, 1886).....                                     | 170       |
| Works, Controlling Waste Water from Beet. (Kozietulski.) (vii, 1888).....                       | 395       |
| Works, Lixivation of Mud in Beet-Root. (Herzfeld.) (viii, 1889).....                            | 632       |
| Works, Manufacture of Carbonic Acid in. (vi, 1887).....                                         | 602       |
| Works, Storage of Diffusion Residues of. (Muller.) (vi, 1887).....                              | 668       |
| Works, Utilising Steam from. (Stammer.) (vi, 1887).....                                         | 296       |
| Yield of, from Maseculite. (Clausen.) (xiii, 1894).....                                         | 1210      |
| -Yielding Carbohydrates in Seeds. (Maxwell.) (ix, 1890).....                                    | 526       |
| Sugars, Action of Cupric Hydrate on. (Habermann and Hönig.) (iii, 1884).....                    | 452       |

| Ores, Obtaining Gold and Silver from. (Probert.) (iv, 1885) ..                                       | 404                  |
| Ores, Treatment of. (P) Labois. (xi, 1892) ..                                                        | 694                  |
| Oxidation of Ferro-Chromium by. (Clark.) (xi, 1892) ..                                               | 503                  |
| Oxidation of, in Germination of Peas. (Tammann.) (v, 1886) ..                                        | 385                  |
| Oxidation of, in Organic Bodies. (Berthelot, André and Matignon.) (ix, 1890) ..                      | 1069                 |

## Sulphur—cont.

PAGE

|                                                                                                                 |                       |
|-----------------------------------------------------------------------------------------------------------------|-----------------------|
| Peroxide, Hydrogen Peroxide from. (Traub.) (viii, 1889) ..                                                      | 881                   |
| -Petroleum, Examination of Canadian. (Mabery.) (xii, 1894) ..                                                   | 567                   |
| Production in Sardinia. (T.R.) (viii, 1889) ..                                                                  | 142                   |
| Production of: (P) Albright and Hood. (xiv, 1895) ..                                                            | 572                   |
| (P) Kynaston. (v, 1886) ..                                                                                      | 94                    |
| (P) Mawdsley and Macfarlane. (v, 1886) ..                                                                       | 536                   |
| (P) Parnell and Simpson. (v, 1886) ..                                                                           | 660                   |
| Production of, at the Lancashire Works. (T.R.) (ix, 1890) ..                                                    | 675                   |
| Production of, from $H_2S$ : (P) Oesterr. Soda-Fabrik, Hruschau. (iv, 1885) ..                                  | 458                   |
| (P) Parnell and Simpson. (viii, 1889) ..                                                                        | 284, 284              |
| (P) Thompson. (viii, 1889) ..                                                                                   | 543                   |
| Production of, from Mixed Gases. (P) Clark. From Gerard and Pabst. (i, 1882) ..                                 | 160                   |
| Production of, from Potassium Salts. (P) Wise. From The Chemische Fabrik Buckau. (x, 1891) ..                   | 767                   |
| Production of, from Pyrites and Sulphides. (P) Claus. (vii, 1888) ..                                            | 440                   |
| Production of, in Italy. (T.R.) (x, 1891) ..                                                                    | 755                   |
| Production of, in Italy in 1888. (T.R.) (vii, 1889) ..                                                          | 585                   |
| Production of, in Sicily. (T.R.) (ix, 1890) ..                                                                  | 671                   |
| Production of, in the United States. (T.R.) (xi, 1892) ..                                                       | 75                    |
| Production of New Bases containing. (P) Newton. From The Farbenfabriken vormals F. Bayer and Co. (xii, 1893) .. | 784                   |
| Purification of Iron and Steel from. (Saniter.) (xi, 1892) ..                                                   | 911; (xii, 1893), 844 |
| Rawes' Process for Recovery of, Experiments on. (Kemp.) (iv, 1885) ..                                           | 144                   |
| -Recovery, Apparatus for. (Chance.) (vii, 1888) ..                                                              | 174                   |
| -Recovery, Mond's Process for. (Schaeppi.) (i, 1882) ..                                                         | 482                   |
| Recovery of. (P) Lunge and Dewar. (xi, 1892) ..                                                                 | 433                   |
| Recovery of, from Alkali Waste: (Chance.) .. (i, 1882), 172; (vii, 1888) ..                                     | 162                   |
| (Divers.) .. (iii, 1884), 550; (iv, 1885) ..                                                                    | 31                    |
| (P) Grouven. (iv, 1885) ..                                                                                      | 209                   |
| (P) Rawes. (iii, 1884) ..                                                                                       | 483                   |
| (Weldon.) (iv, 1885) ..                                                                                         | 171                   |
| (P) Weldon. (ii, 1883) ..                                                                                       | 414                   |
| (P) Weldon. From Lombard. (iii, 1884) ..                                                                        | 259                   |
| Recovery of, from Coal Gas. (P) Hammond. (vi, 1887) ..                                                          | 719                   |
| Recovery of, from Coal Gas, and Apparatus therefor. (P) Estcourt, Vevers, and Schwab. (vii, 1888) ..            | 203                   |
| Recovery of, from Gaseous Mixtures. (Lunge.) (ix, 1890) ..                                                      | 1018                  |
| Recovery of, from Lime used in Gas Purifiers. (P) Walker. (ix, 1890) ..                                         | 49                    |
| Recovery of, from Residues. (P) Lyte and Tatters. (ix, 1890) ..                                                 | 1129                  |
| Recovery of, from Sulphuretted Hydrogen. (P) Barrow. (ix, 1890) ..                                              | 188                   |
| Recovery of, from Tank Waste. (T.R.) (ix, 1890) ..                                                              | 672                   |
| Recovery of, from Waste Gases. (P) Allhusen, Edgell, and Russell. (xii, 1893) ..                                | 263                   |
| Recovery of, in Reduction of Antimony. (Borchers.) (vi, 1887) ..                                                | 673                   |
| Recovery Process, Treatment of Waste Gases of the Chance-Claus. (Kynaston.) (xii, 1893) ..                      | 319                   |
| Recovery, Schaffner and Helbig's Process for. (Chance.) (i, 1882), 264; (ii, 1883) ..                           | 202                   |
| Reducing Sulphuretted Ore into Oxide and. (P) Bemelmans. (xiii, 1894) ..                                        | 153                   |
| Refining. (P) Labois. (xi, 1892) ..                                                                             | 687                   |
| Removal of, from Mineral Oils. (Riche and Roume.) (xiii, 1894) ..                                               | 710                   |
| Separating, from Sulphurous Pig Iron. (P) Hilgenstock and Massenez. (x, 1891) ..                                | 704                   |
| Silicium. (T.R.) (vii, 1889) ..                                                                                 | 930                   |
| -Slags and Phosphorus Slags, &c., Purification and Decomposition of. (Frank.) (iii, 1884) ..                    | 630                   |
| Springs, Microscopic Flora in. (Olivier.) (vi, 1887) ..                                                         | 298                   |
| Test for Free. (Gil.) (xiii, 1894) ..                                                                           | 175                   |
| Trade in Italy. (T.R.) (ix, 1890) ..                                                                            | 906                   |
| Trade in Sicily. (T.R.) (vii, 1888) ..                                                                          | 130                   |
| Treatment of Ores and Compounds containing. (P) Lewis and Gelsch. (xii, 1893) ..                                | 842                   |
| Treatment of Shales Impregnated with. (P) Irvine and Slater. (iii, 1884) ..                                     | 236                   |
| Treatment of Sulphuretted Hydrogen to Obtain. (P) Hargreaves. (viii, 1889) ..                                   | 706                   |
| Trioxide, Portable Holder for. (Hensgen.) (xii, 1893) ..                                                        | 835                   |
| Trioxide, Water, and Bi-sulphates of Sodium or Potassium, Solid Compounds of. (P) Brindley. (xi, 1892) ..       | 1001                  |
| Two New Forms of. (Engel.) (x, 1891) ..                                                                         | 630                   |
| Use of Sodium Peroxide in Estimation of. (Edinger.) (xiv, 1895) ..                                              | 398                   |
| Utilisation of Zinc Blende to Obtain. (P) Brock and others. (xiv, 1895) ..                                      | 963                   |
| Volumetric Determination of. (Klobukow.) (iv, 1885) ..                                                          | 613                   |
| Wiborgh's Test for: (Jüptner.) (vi, 1887) ..                                                                    | 304                   |
| (Vosmaer.) (vii, 1889) ..                                                                                       | 726                   |
| See also under Brimstone.                                                                                       |                       |
| Sulphurets, Rarer Elements found in Leadville. (Eartlett.) (viii, 1889) ..                                      | 896                   |
| Use of Metallic, as Mordants. (Balanche.) (i, 1882) ..                                                          | 194                   |
| Sulphuretted Hydrogen. See under Hydrogen.                                                                      |                       |

| Sulphuric Acid:                                                                                                                   |          | Sulphuric Acid—cont.                                                                                 |                                    |
| Action of Dilute, on Cholera Bacteria. (Stutzer.) (xii, 1893).....                                                                | 705      | Concentration of, and Apparatus therefor:                                                            |                                    |
| Action of Metals on. (Ditte.) (ix, 1890).....                                                                                     | 547      | (P) Leslie. From French. (vi, 1887).....                                                             | 216                                |
| Action of, on $\alpha$ -Nitronaphthalene. (Palmer.) (viii, 1889).....                                                             | 116      | (P) Levinstein. (xii, 1893).....                                                                     | 156                                |
| Action of, on Aluminium:                                                                                                          |          | (P) Négrier. (x, 1891).....                                                                          | 639                                |
| (Ditte.) (ix, 1890).....                                                                                                          | 549      | (P) Veitch. (vii, 1889).....                                                                         | 983                                |
| (Le Roy.) (xi, 1892).....                                                                                                         | 166, 918 | Concentration of, in an Iron Pan. (P) Grindley. (ii, 1885).....                                      | 41                                 |
| Action of, on Benzene Hydrocarbons. (Lunge and Barbezat.) (ii, 1883).....                                                         | 166      | Concentration of, in Apparatus of Cast-iron and Platinum. (Scheurer-Kestner.) (xi, 1892).....        | 746                                |
| Action of, on Citrene. (Bouchardat and Lafont.) (xii, 1893).....                                                                  | 372      | Concentration of, in Glass Retorts. (Lity.) (xii, 1893).....                                         | 153                                |
| Action of, on Concentrated, upon Benzene. (Lunge.) (ii, 1883).....                                                                | 166      | Concentration of, in Gold Lined Platinum Stills. (Lunge.) (xi, 1892).....                            | 522                                |
| Action of, on Diethylnaphthylamine at High Temperatures. (Smith.) (i, 1882).....                                                  | 319      | Concentration of, in Lead Vessels. (P) Wolters. (xii, 1894).....                                     | 887                                |
| Action of, on Durene. (Jacobsen.) (v, 1886).....                                                                                  | 375      | Concentration of, Processes for. (Gerber.) (xiii, 1894).....                                         | 36                                 |
| Action of, on Ferrous and Aluminium Sulphates. (Jeremian.) (vii, 1888).....                                                       | 841      | Consumption of Coal in Kessler Process of Concentration of. (Kessler.) (xiv, 1895).....              | 1645                               |
| Action of, on Lead. (Lunge.) (xii, 1893).....                                                                                     | 146      | Decomposing Bone Earth with. (Stolha.) (vii, 1888).....                                              | 333                                |
| Action of, on Metallic Copper. (Schuster.) (xiii, 1894).....                                                                      | 957      | Decomp. of Sodium Nitrate by. (Volney.) (xi, 1892).....                                              | 347                                |
| Action of, on Oleic Acid. (Szabanejew.) (v, 1886).....                                                                            | 452      | Decomposition of Sodium Thiosulphate by. (Vaubel.) (vii, 1889).....                                  | 704                                |
| Action of, on Oleic Acid and its Triglyceride. (Gitel.) (vii, 1888).....                                                          | 218      | Determination of Ash in Sugar by. (Danzys.) (vii, 1888).....                                         | 348                                |
| Action of, on Ozokerite. (Zaloziecki.) (vi, 1887).....                                                                            | 652      | Determination of Combined. (Andrews.) (ix, 1890).....                                                | 328                                |
| Action of, on Protocatechuic Acid. (Nolting and Bourcart.) (i, 1882).....                                                         | 340      | Disinfection of Town Sewage with. (Ivanoff.) (xii, 1894).....                                        | 557                                |
| Action of, on Pyrocatechol and Homopyrocatechol. (Cousin.) (xii, 1894).....                                                       | 60       | Dynamic Theory of Manuf. of. (Hurter.) (i, 1882).....                                                | 8, 49, 83                          |
| Action of, on Quinol. (Stebbins.) (x, 1891).....                                                                                  | 854      | Electrical Heat for Concentrating. (Haußermann and Niethammer.) (xii, 1894).....                     | 391                                |
| Action of, on Tribromophenol. (Georgesco.) (ix, 1890).....                                                                        | 731      | Electrolytic Production of. (P) Eloore and Barrett. (vi, 1887).....                                  | 140                                |
| Action of Zinc on Dilute. (Pullinger.) (ix, 1890).....                                                                            | 946      | Estimation of:                                                                                       |                                    |
| Affinity of Hydrated Sulphates for. (Fink.) (vi, 1887).....                                                                       | 728      | (Jannasch and Richards.) (viii, 1889).....                                                           | 819                                |
| And Alkali Trade of England. (Lunge.) (iii, 1884).....                                                                            | 479      | (Windisch.) (xii, 1894).....                                                                         | 905                                |
| And Bichromate of Potash as a Mordant for Wool. (Liechti and Hummel.) (xii, 1893).....                                            | 241      | Estimation of Fumig. (Lunge.) (xiv, 1895).....                                                       | 821                                |
| And Hydrochloric Acid for Decomposition of Chlorides, &c. (P) Pedder. (xi, 1892).....                                             | 815      | Ethers, Production of. (P) Newton. From The Farbenfabriken vormals F. Bayer and Co. (xii, 1894)..... | 60                                 |
| And its Salts, Purification of. (P) Meikle. (iv, 1885).....                                                                       | 345      | Evaporating Pans for. (P) McDougall. (xiv, 1895).....                                                | 158                                |
| And Manganate of Soda Contracts. (T.R.) (ix, 1890).....                                                                           | 1167     | Expelling, from Sulphates and Bi-sulphates. (P) Johnson. From Kessler. (vi, 1887).....               | 292                                |
| And Selenic Acid, Action of, in Organic Chemistry. (Istrati.) (viii, 1889).....                                                   | 876      | Expulsion of Ammoniacal Compounds from. (Moritz.) (ix, 1890).....                                    | 443                                |
| And Sulphurous Acid Fumes, Method and Apparatus for Condensing. (P) Thorp. (ix, 1890).....                                        | 623      | Formation of. (Friesel.) (xiv, 1895).....                                                            | 656                                |
| And Sulphurous Acids, Treating Pyrites for Manufacture of. (P) Wurtz. (i, 1882).....                                              | 67       | Formation of, in Burning Coal-Gas. (Priwoznik.) (xii, 1893).....                                     | 29                                 |
| Apparatus for Absorption of. (vi, 1887).....                                                                                      | 597      | Freezing Point of:                                                                                   |                                    |
| Apparatus for Avoiding Loss of Nitric Acid in Manufacture of. (P) Becker and Lasne. (i, 1882).....                                | 180      | (Lunge.) (i, 1882).....                                                                              | 149                                |
| Apparatus for Concentration of:                                                                                                   |          | (Pictet.) (xiv, 1895).....                                                                           | 35                                 |
| (P) Bartsch. (iv, 1885).....                                                                                                      | 500      | Freezing Points of, of Varying Strengths. (Thilo.) (xii, 1893).....                                  | 827                                |
| (P) Boulton. From Willott. (iv, 1885).....                                                                                        | 499      | From Brimstone, Cost of. (T.R.) (xi, 1892).....                                                      | 76                                 |

| (P) Lake. From Cummings. (v, 1886)..... | 480 |
| (P) Lange. (viii, 1889).....            | 774 |
| (P) Parnell and Simpson. (v, 1886)..... | 666 |
| (Pemberton.) (ii, 1883).....            | 414 |
| (P) Pratt. (xii, 1893).....             | 806 |
| (P) Rice. (xii, 1893).....              | 833 |
| (P) Sorel. (ix, 1890).....              | 175 |
| (P) Sprengel. (v, 1886).....            | 648 |
| (P) Staub. (xiv, 1895).....             | 572 |
| (P) Weldon. From Lange. (ii, 1883)..... | 414 |

## Manufacture of, and Apparatus therefor:

|                                           |     |
|-------------------------------------------|-----|
| (P) Burns. (vi, 1887).....                | 662 |
| (P) Finch and Willoughby. (iv, 1885)..... | 210 |

## Manufacture of Anhydrous:

|                                                           |     |
|-----------------------------------------------------------|-----|
| (P) Newton. From Nobel and Fehrenbach. (iv, 1885).....    | 498 |
| (P) Pitt. From Razosine and Dvorkovitch. (vii, 1888)..... | 628 |

## Manufacture of Anhydrous, in France. (ix, 1890).....

## Manufacture of, at Moldova. (v, 1886).....

## Manufacture of, during 1891. (Schertel.) (xi, 1892).....

## Manuf. of, from Alkali Waste. (P) Hanson. (vii, 1885).....

## Manufacture of, from Copper- and Iron Pyrites. (P) Brin. (vi, 1887).....

## Manufacture of, from Potassium Salts. (P) Wise. From The Chemische Fabriken Buckau. (x, 1891).....

## Manufacture of, from Proto-Sulphate of Iron. (P) D'Andria. (xiii, 1891).....

## Manufacture of Fuming, from Acid Waste. (P) Starek. (ix, 1890).....

## Manufacture of, in America. (Lunge).....(iii, 1884), 519;

## Manufacture of, in Italy. (T.R.) (xiv, 1895).....

## Manufacture of, in New Zealand. (i, 1882).....

## Manufacture of, in United States. (Martyn.) (iv, 1885).....

## Manufacture, Recent Progress in. (T.R.) (ix, 1890).....

## Manufacturers, Syndicate of the Rheinisch Westphalian. (T.R.) (vi, 1887).....

## Nöbner's Method of Concentrating. (xi, 1892).....

## Nitrogen Compounds in, Detection of. (Lunge.) (vi, 1887).....

## Oxidation of Copper in presence of Dilute. (Traube.) (iv, 1885).....

## Permissible Amount of, in Clarets. (i, 1882).....

## Pickle, Treatment of. (P) Dan. (ix, 1890).....

## Preparation of Anhydrous. (P) Rath. (iii, 1881).....

## Prep. of, from Gypsum. (Scheurer Kestner.) (iv, 1885).....

## Process, Suggestions for Impt. of. (Bode.) (ix, 1890).....

## Process, Theories of the:

## (Hamburger.) (viii, 1889).....

## (Lunge.) (vii, 1888).....

## (Potter.) (xii, 1893).....

## (Raschig.) (vii, 1888).....

## Production of Concentrated, by Electrolysis. (P) Wacker. (xiv, 1895).....

## Products of Concentration of Acetone with Concentrated. (Orndorff and Young.) (xii, 1893).....

## Purification of:

## (P) Menzies. (iii, 1884).....

## (P) Toed. (vii, 1888).....

## (P) Thompson. From Thomson and Kemp. (iv, 1885).....

## (Tjaden-Modderman.) (i, 1882).....

## Purification of, for Accumulators. (Kusel.) (xi, 1892).....

## Quantitative Determination of. (Ziegler.) (i, 1882).....

## Reactions of Vanado-, on Glucosides and Alkaloids. (Kundrat.) (viii, 1889).....

## Recovery of, from Lyes. (P) Grabowski. (xii, 1893).....

## Recovery of Nitrous Compounds in Manufacture of. (P) Societ' des Produits Chimiques de Javel. (iv, 1885).....

## Rectifying. (P) Scott. (xiv, 1895).....

## Red Colouring of. (Nörrenberg.) (ix, 1890).....

## Reducing Action of Coke on Nitric Acid dissolved in. (Lunge.) (iv, 1885).....

## Results Obtained in Manufacture of. (Hepworth.) (iii, 1881).....

## Retorts for Restoring Spent. (Roppold and Leeth.) (i, 1882).....

## Selenium in. (Davis.) (ii, 1883).....

## Solubility of Nitric Oxide in. (Lunge.) (iv, 1885).....

## Solution, Reduction of Nitrobenzene in. (Noyes and Clement.) (xii, 1893).....

## Sorel's Paper on, Report on. (Wys.) (ix, 1890).....

## Source of Error in Determ. of. (Von Meyer.) (ix, 1890).....

## Specific Gravity of. (Lunge and Naef.) (ii, 1883).....

## Specific Gravity of, Determinations of. (Lunge and Isler.) (ix, 1890).....

## Specific Gravity of, Empirical Method of Determining. (Hager.) (ii, 1887).....

## Specific Gravity Tables for. (i, 1882).....

## (Lunge.) (ix, 1890).....

## Specific Heat of, of Various Strengths. (Bode.) (viii, 1889).....

## Table of Specific Gravities of Strong. (Richmond.) (ix, 1890).....

## Test for Fuel Oil Unreliable. (Glascnapp.) (xiv, 1895).....

## Testing Aluminium Sulphate for. (Bayer.) (vi, 1887).....

## Testing Hydrochloric Acid for. (Lunge.) (i, 1882).....

## Tetrahydrate, Isolation of a. (Pickering.) (ix, 1890).....

## Tower. (P) Nichols and Herrshoff. (v, 1883).....

Sulphuric Acid—*cont.*

## Trade in Brazil. (T.R.) (xi, 1892).....

## Trade in Turkey. (T.R.) (ix, 1890).....

## Transport of. (P) England. (xiv, 1895).....

## Treating Chlorosis in Vines by. (Gastine and Degrauly.) (xiv, 1895).....

## Treating Mineral Oils with Arsenical. (Krey.) (v, 1886).....

Treatment of Ammonium Sulphate, to obtain the NH<sub>3</sub> free, and to Utilise the. (P) Carey, Gaskell, and Hunter. (iv, 1885).....

## Use of Electrical Heat for Concentration of. (Bucherer.) (xiii, 1891).....

## Use of Pyrites in Manufacture of. (Scheurer-Kestner.) (v, 1886).....

## Utilisation of Iron Oxide from Manufacture of. (P) Bradbury. (x, 1891).....

## Valuation of. (Morrison.) (xi, 1892).....

## Valuation of Fuming. (Setlik.) (ix, 1890).....

## Volumetric Estimation of:

## (Farnsteiner.) (xi, 1892).....

## (Gawalowski.) (vii, 1888), 455; (ix, 1890), 416

## Works at Johannesburg. (T.R.) (xiii, 1891).....

## Works in Argentina. (T.R.) (viii, 1889).....

## Works, Opening of, in New Zealand. (T.R.) (ix, 1890).....

## See also under Chamber Acid, Chamber Gases, and Vitriol.

## Sulphuric Anhydride, Formation of, in Burning Sulphur. (Lunge.) (ii, 1883).....

## Anhydride, Manufacture of, and Apparatus therefor. (P) Ellie-Clark. (viii, 1889).....

## Anhydride, Production of:

## (Gruher.) (iv, 1885).....

## (P) Hamisch and Schröder. (vi, 1887).....

## Sulphurous Acid:

## Absorption and Utilisation of. (Hasenclever.) (i, 1882).....

## Absorption of. (P) Lyte. (i, 1882).....

## Action of Carbon on. (Scheurer-Kestner.) (xi, 1892).....

## Action of, on Alkaline Hyposulphites. (Villiers.) (viii, 1889).....

## Action of, on Flowers of Sulphur. (Colefax.) (xi, 1892).....

## Action of, on Metals. (Uhl.) (ix, 1890).....

## Action of, on Nitrous Acid. (Raschig.) (vi, 1887).....

## Action of, on Oleic and Eradic Acid. (Saytzeff.) (xiii, 1891).....

## Alteration of, in Wines. (Chuard and Jaccard.) (xiii, 1891).....

## And Beer-Brewing. (i, 1882).....

## And Iodometry. (Volhard.) (vi, 1887).....

## And its Salts, Purification of. (P) Meikle. (iv, 1885).....

## And its Salts, Titration of. (Lunge.) (ii, 1883).....

## Apparatus for Absorption of. (vi, 1887).....

## Apparatus for Extracting, from Pyrites. (P) Henderson. From Lebois. (iv, 1885).....

## Apparatus for Manufacture of. (P) Allison. From Nat. Chem. Machine Co. (iii, 1884).....

## Apparatus for Producing, from Sulphuretted Hydrogen. (P) Simpson and Parnell. (vi, 1887).....

## Apparatus for Producing Solutions of. (P) Horsley and Wilson. (x, 1891).....

## Apparatus for Recovering, from Paper Manufacture. (P) Kellner. (x, 1891).....

## Apparatus for Treatment of Wine with. (P) Nessler. (iv, 1885).....

## As a Bleaching Agent. (Moyret.) (i, 1882).....

## Contained in Wines. (Seifert.) (xii, 1893).....

## Dehydration of. (P) Pictet. (ii, 1883).....

## Determination of. (Blarez.) (v, 1886).....

## Effect produced by, on Atmosphere of Towns. (Witz.) (iv, 1885).....

## Employment of, in Malting. (Kukla.) (xiii, 1891).....

## Examination of Raw Sugar for. (vi, 1887).....

## Extracting Fats and Oils by. (P) Grills and Schröder. (ix, 1890).....

## Extraction of, from Fumes of Furnaces. (P) Brydges. From Hütisch and Schröder. (iii, 1884).....

## For Disinfecting. (P) Hanlon. (viii, 1889).....

## From Decomposed Iron Sulphate. (P) Terrell. (iii, 1884).....

## From Manufacture of Zinc Sulphide. (P) Johnson. From Mechrlane. (iv, 1885).....

## Gas, Production of. (P) Addie. (vi, 1887).....

## Gas, Utilisation of. (P) Abel. From Precht. (i, 1882).....

## In Beer. (Pfeifer.) (viii, 1889).....

## In its Compounds, Estimation of. (Giles and Shearer.) (iii, 1884).....

## In Preserved Foods. (Bayer.) (ix, 1890).....

## In Products of Combustion of Illuminating Gas. (Collan.) (xiv, 1895).....

## In Wine:

## (Ripper.) (xiv, 1895).....

## (Schaffer and Bertschinger.) (xiv, 1895).....

## In Wines and other Fluids, Detection of. (Liebmann.) (i, 1882).....

## Injurious Action of, on Vegetation. (Just.) (vii, 1888).....

## Liquid. (Barth.) (xii, 1893).....

## Liquid Anhydrous, from Furnace and other Gases. (P) Haenisch and Schröder. (iv, 1885).....

## Loss of Alkali by, in Leblanc Process. (Pratt.) (iv, 1885).....

## Manufacture of:

## (Bellinger.) (v, 1886).....

## (P) D'Andria. (xiii, 1891).....

## (P) Hart. (v, 1889).....

## (P) Hütsebeck. (xii, 1893).....

## (P) McDougall. (ii, 1883).....

| Apparatus for Melting:                                                                                                                |      |
| (P) Pfützner. (xi, 1892)                                                                                                              | 620  |
| (P) Wild. (x, 1891)                                                                                                                   | 471  |
| British Trade in, in 1888. (T.R.) (viii, 1889)                                                                                        | 836  |
| Extraction of Olein from. (P) Soler. (xii, 1893)                                                                                      | 609  |
| Extraction of Stearin and Olein from. (P) Benoit and Soler y Vila. (xi, 1892)                                                         | 620  |
| Freeing, from Smell of Petroleum. (iii, 1884)                                                                                         | 181  |

## Tallow—cont.

|                                                                                    |         |
|------------------------------------------------------------------------------------|---------|
| Importation of, for Soap Manufacture in Nicaragua. (T.R.) (ix, 1890)               | 124     |
| In Candles. (x, 1891)                                                              | 36      |
| Melting or Rendering. (P) Fraser and Cassinet-Palmer. (xi, 1893)                   | 771     |
| Refined Fish. (Ritter.) (xiii, 1894)                                               | 194     |
| Solidifying Point of Fatty Acids of. (Finkener.) (viii, 1889)                      | 423     |
| Specific Gravity of, Determination of. (Wolckenhaur.) (iv, 1885)                   | 601     |
| Title of, Estimation of. (Wolfbauer.) (xiii, 1894)                                 | 908     |
| Trade of Russia. (T.R.) (x, 1891)                                                  | 394     |
| Tree, Fat and Grease of the Chinese. (iii, 1884)                                   | 181     |
| Valuation of. (Wolfbauer.) (xiii, 1894)                                            | 181     |
| Vegetable, and White Wax in China. (T.R.) (vii, 1888)                              | 598     |
| Tallows and Substitutes, Rapid Methods for Testing. (Taffe.) (ix, 1890)            | 218     |
| Comparing Solidifying Points of. (Finkener.) (ix, 1890)                            | 1071    |
| Tamacoaré, Balsam of. (Pfaff.) (xiv, 1895)                                         | 382     |
| Tannar, Arsenic Works on the. (Gould.) (xii, 1893)                                 | 692     |
| Tamarinds, Alcohol from, in New Caledonia. (T.R.) (viii, 1889)                     | 430     |
| Tan, Apparatus for Burning. (P) Brown. (x, 1891)                                   | 239     |
| Bark, Preparation of, for Transportation. (P) Sherman. (i, 1882)                   | 510     |
| Liquors, Analysis of Acid. (Passler.) (xiv, 1895)                                  | 316     |
| Paper-making from. (Kingszett.) (i, 1882)                                          | 80      |
| Substances, Some New South Wales. (Maiden.) (vii, 1888)                            | 38      |
| Tanghinin and Digitalin. (Arnaud.) (ix, 1890)                                      | 324     |
| Extracted from Tanghinia Venenifera of Madagascar. (Arnaud.) (viii, 1889)          | 1008    |
| Tangiers, Commercial Museum at. (T.R.) (vii, 1888)                                 | 597     |
| Tank Furnaces for Manuf. of Glass. (P) Thomas. (xi, 1892)                          | 1007    |
| Liquors, Purification of. (P) Chance. (v, 1886)                                    | 325     |
| Rendering. (P) Spiegel. (ii, 1883)                                                 | 161     |
| Waters, Conversion of, into Fertilisers. (P) van Ruymbekke. (v, 1886)              | 496     |
| Tanks, Apparatus for Removing Deposits from Settling. (P) Corbett. (xiv, 1895)     | 1058    |
| Conductors for Electrolytic Decomposing. (P) Leith and others. (xiv, 1895)         | 1048    |
| Electrodes of Electrolytic Converting. (P) Tasker and Jones. (v, 1886)             | 172     |
| For Electrical Decomposition of Chlorides. (P) Richardson. (xiii, 1894)            | 646     |
| For Electrolysis. (P) Elmore. (xii, 1893)                                          | 698     |
| For Hydrochloric Acid. (P) Owens. (xii, 1893)                                      | 1030    |
| For Precipitation of Sewage:                                                       |         |
| (P) (i, 1882)                                                                      | 335     |
| (P) Candy. (xiv, 1895)                                                             | 56, 674 |
| (P) Ives. (xiii, 1894)                                                             | 852     |
| For Purification of Sewage. (P) Ives and Bristow. (xii, 1893)                      | 778     |
| For Storage of Compressed Air, Gas, and Volatile Liquids. (P) Timmis. (xiii, 1894) | 788     |
| For Subsidence of Sewage Sludge. (P) Lockwood. (xii, 1894)                         | 970     |
| Manufacture of Glass. (P) Armstrong. (xi, 1892)                                    | 605     |
| Manufacture of Lead. (P) Davies. (ix, 1890)                                        | 952     |
| Overflow Arms of Precipitating. (P) Ives. (xiv, 1895)                              | 177     |
| Regulating Discharge of Liquids from. (P) Strype. (xiii, 1894)                     | 1180    |
| Safety Arrangements for Oil Storage. (P) Thwaite. (xii, 1893)                      | 591     |
| Seven-bottom for Filter. (P) Kroger. (vi, 1887)                                    | 649     |
| Tanneries, Canadian. (T.R.) (xi, 1892)                                             | 554     |
| Purifying Waste from. (P) Calvert and Chaffer. (x, 1891)                           | 36      |
| Tannic Acid:                                                                       |         |
| (Böttinger.) (ix, 1890)                                                            | 955     |
| A New Reaction of. (Saul.) (vi, 1887)                                              | 151     |
| Absorbed by Cotton, Amounts of. (Knecht and Kersbaw.) (xi, 1892)                   | 129     |
| Behaviour of, to Various Reagents. (Etli.) (iii, 1884)                             | 644     |
| Böttinger's New Reaction for. (Smith.) (ix, 1890)                                  | 450     |
| Clarifying Sugar Solutions with. (P) Heffter. (vii, 1888)                          | 446     |
| Compounds of Soluble Albumen with. (Böttinger.) (vii, 1888)                        | 331     |
| Conversion of, into Benzoic Acid. (Guiznet.) (xi, 1892)                            | 261     |
| Determination of. (Gawalowski.) (ii, 1883)                                         | 163     |
| Dyeing with Substances containing. (P) Gradage and Steel. (iv, 1885)               | 455     |
| Estimation of:                                                                     |         |
| (Dreaper.) (xii, 1893)                                                             | 412     |
| (Simand.) (i, 1882)                                                                | 459     |
| In Rowan Berries, Modification of. (Vincent and Delachanal.) (vi, 1887)            | 559     |
| In Waste Tans, Determination of. (Gawalowski.) (ii, 1883)                          | 183     |
| Italian Customs Report on. (x, 1891)                                               | 55      |
| Manufacture of. (P) (i, 1882)                                                      | 413     |
| (P) Hyk. (vi, 1887)                                                                | 360     |
| Oxidation of, in Apples used for Cider. (Lindet.) (xiv, 1895)                      | 1055    |
| Solutions, "Discolouring." (P) Haddan. From Landini. (ix, 1890)                    | 199     |
| See also under Gallotannic Acid.                                                   |         |
| Tannic Acids, Chemistry of. (Etli.) (ix, 1890)                                     | 398     |

| Degener. (i, 1882) . . .                                                                                                     | 242  |
| And Gases, Apparatus for Cooling. (P) Weldon. From Pechiney. (v, 1883) . . .                                                 | 325  |
| And Gases, Pumps for. (P) Bannister. (viii, 1889) . . .                                                                      | 111  |
| Apparatus for Absorption of, by Liquids. (P) Edwards. From Rohmann and Hiller. (v, 1886) . . .                               | 423  |
| Apparatus for Charging Gases with. (P) Reichling. (viii, 1889) . . .                                                         | 869  |
| Apparatus for Condensation and Purification of. (P) Theisen. (xi, 1892) . . .                                                | 668  |
| Apparatus for Condensing:                                                                                                    |      |
| (P) Henneberg. (xiii, 1894) . . .                                                                                            | 713  |
| (P) Newton. From Hart. (xiii, 1894) . . .                                                                                    | 1197 |
| (P) Popper. (ix, 1890) . . .                                                                                                 | 168  |
| (P) Schwager. (x, 1891) . . .                                                                                                | 449  |
| (P) Steinmüller. (iv, 1885) . . .                                                                                            | 737  |
| (P) Thompson. From Mathieu. (iv, 1885) . . .                                                                                 | 114  |
| Apparatus for Condensing Metallic. (P) Grützner and Koehler. (ix, 1890) . . .                                                | 949  |
| Apparatus for Cooling, &c. (P) Boul. From Fischer. (vii, 1888) . . .                                                         | 554  |
| Apparatus for Cooling or Condensing. (P) Schmidt. (viii, 1889) . . .                                                         | 271  |
| Apparatus for Ejecting or Withdrawing. (P) Edwards. From Kohmann. (xi, 1892) . . .                                           | 422  |
| Apparatus for Generating and Burning. (P) Paquelin. (xii, 1893) . . .                                                        | 136  |
| Apparatus for Generating and Hydrating. (P) Clark. From Maynard. (iv, 1885) . . .                                            | 213  |
| Apparatus for Mixing and Burning. (P) Tyler and De Vesian. (xiv, 1895) . . .                                                 | 793  |
| Apparatus for Removing and Purifying Noxious. (P) Smith. (ix, 1890) . . .                                                    | 852  |
| Apparatus for Separating, from Liquids. (P) Murrie. (v, 1886) . . .                                                          | 468  |
| Apparatus for Separating Liquids, or Solids from. (P) Jones. (x, 1891) . . .                                                 | 240  |
| Apparatus for Treating Noxious. (P) Makinson. (xi, 1892) . . .                                                               | 704  |
| Apparatus for Treating Textiles with. (P) Mather. (viii, 1889) . . .                                                         | 460  |
| Colours and Spectra of Incandescent Metallic. (Dudley.) (xi, 1892) . . .                                                     | 924  |
| Condensing, and Apparatus therefor. (P) Gamgee. (x, 1891) . . .                                                              | 823  |
| Containing Fluorine, Removal of, in Manure Works. (x, 1891) . . .                                                            | 558  |
| Dehydration of. (P) Mather. (xii, 1893) . . .                                                                                | 792  |
| Effect of Noxious, on Vegetation. (Fricke.) (vi, 1887) . . .                                                                 | 733  |
| Evolved in Manufacture of India-rubber Goods, Apparatus for Condensing. (P) Burghardt. (iii, 1884) . . .                     | 157  |
| Hydrocarbon, Determination of. (Hempel and Dennis.) (x, 1891) . . .                                                          | 578  |
| Hydrochloric Acid in Chimney. (Davis.) (i, 1882) . . .                                                                       | 214  |
| Inflammable, Detecting and Measuring. (P) Tilghmann. (xiii, 1894) . . .                                                      | 1052 |
| Lawrence Cooling Apparatus for Spirituous. (P) Thiesen. (ii, 1883) . . .                                                     | 294  |
| Of Formaldehyde, Antiseptic Properties of. (Trillat.) (xiv, 1895) . . .                                                      | 380  |
| Of Manure Works, Noxious. (Morison.) (x, 1891) . . .                                                                         | 338  |
| Of Oil, Apparatus for Burning. (P) Mills. From Seikle-Goujou. (x, 1891) . . .                                                | 244  |
| Of Solvents, Apparatus for Driving off Heavy. (P) Parent Syndicate Oil Extractor Co., Ltd., and Dombrain. (xiii, 1894) . . . | 240  |

|--------------------------------------------------------------------------------------------------------------------|------------------------|
| Purifying Waste, and Apparatus therefor. (P) Mylius. (x, 1891) .....                                               | 1021                   |
| Rate of Evaporation of. (Lesage.) (xii, 1893) .....                                                                | 262                    |
| Reducing Action of Organic Substances contained in, upon Permanganate of Potassium. (Zegn.) (xii, 1894) .....      | 427                    |
| Removal of Bacteria from, by Filtration. (Sedgwick.) (ix, 1890) .....                                              | 641                    |
| Removal of Iron from Drinking. (Schuster.) (xiii, 1894) .....                                                      | 1053                   |
| Removal of Pathogenic Bacteria from. (Fuller.) (xii, 1894) .....                                                   | 830                    |
| Removing Calcareous Deposits from. (de Derschau.) (i, 1882) .....                                                  | 176                    |
| Rendering Tar Oils Soluble in. (P) Dammann. (x, 1891) .....                                                        | 380                    |
| Research Committee of Royal Society, Report on Bacteriology of Water. (Frankland and Ward.) (xi, 1892) .....       | 704; (xii, 1893), 1051 |
| Separating Impurities from. (P) Lyon. (xii, 1894) .....                                                            | 377                    |
| Separation of Oils and Fats from. (P) Dehne. (xiv, 1895) .....                                                     | 1058                   |
| Shotley Spa, Analysis of. (Peile.) (vii, 1888) .....                                                               | 14, 70                 |
| Soap Soluble in Sea. (P) Wilke. (viii, 1889) .....                                                                 | 203                    |
| Softening: (Davis.) (viii, 1889) .....                                                                             | 563                    |
| (P) Maignen. (iv, 1885) .....                                                                                      | 545                    |
| Softening and Purifying: (P) Davis. (vii, 1888) .....                                                              | 321                    |
| (P) McLaren and Carrod. (xiv, 1895) .....                                                                          | 983                    |
| (P) Phillips. From Harwood. (viii, 1889) .....                                                                     | 302                    |
| (P) Sawrey. (vi, 1887) .....                                                                                       | 501                    |
| Softening, for Brewing. (Langer.) (xi, 1892) .....                                                                 | 543                    |
| Softening Hard. (P) Brothers. (xiv, 1895) .....                                                                    | 379                    |
| Softening of, and Apparatus therefor. (P) Lawrence. (x, 1891) .....                                                | 624                    |
| Softening Processes. (P) Maignen. (v, 1886) .....                                                                  | 388                    |
| Solubility of Active Principles of Cinchona in. (Laudrin.) (vii, 1889) .....                                       | 640                    |
| Solubility of Cresols in. (Gruber.) (xii, 1893) .....                                                              | 1053                   |
| Solubility of Gases in. (Winkler.) (x, 1891) .....                                                                 | 387                    |
| Solubility of Minerals in Sea. (Thoulet.) (viii, 1889) .....                                                       | 621                    |
| Solubility of Oxygen in. (Winkler.) (viii, 1889) .....                                                             | 727                    |
| Solubility of Sugar in. (Herzfeld.) (xi, 1892) .....                                                               | 542                    |
| Solution for Determining Hardness of. (Tichborne.) (i, 1882) .....                                                 | 383                    |
| Solvent Action of, on Glass. (x, 1891) .....                                                                       | 461                    |
| Spread of Cholera through Medium of. (Marcy.) (iv, 1885) .....                                                     | 239                    |
| Sterilisation of River. (Krohnke.) (xii, 1893) .....                                                               | 857                    |
| Sterilisation of River Water by Mine. (Breneman.) (ix, 1890) .....                                                 | 1058                   |
| Sterilising, and Apparatus therefor. (P) Biquart. (x, 1891) .....                                                  | 846                    |
| Sterilising, Process and App. for. (P) Babes. (xii, 1893) .....                                                    | 460                    |
| Storing Force of. (P) Clark. From Honigmann. (v, 1886) .....                                                       | 158                    |
| Supplies, Purity of Drinking. (Thresh.) (xiv, 1895) .....                                                          | 379                    |
| Supplies, Quality of. (Mason.) (xiv, 1895) .....                                                                   | 293                    |
| Supply, Bacteriological Research on. (Frankland.) (vi, 1887) .....                                                 | 316                    |
| Supply of, from Wells, and its Hygienic Aspect. (Hueppe.) (viii, 1889) .....                                       | 208                    |
| System of Filtering Large Quantities of. (Steiger.) (v, 1886) .....                                                | 416                    |
| Test, Koch's. (Bischof.) (v, 1886) .....                                                                           | 114                    |
| Testing for, in Butter, &c. (P) Geldard. (xii, 1893) .....                                                         | 790                    |
| Testing of Bitter Almond. (Beckurts.) (vi, 1887) .....                                                             | 567                    |
| Treating Sea, for Marine Bathers. (P) Bramley. (ix, 1890) .....                                                    | 504                    |
| Treatment of: (Hartland.) (v, 1886) .....                                                                          | 644                    |
| (P) Lawrence. (xiv, 1895) .....                                                                                    | 982                    |
| Treatment of, for Technical Purposes. (Macnab and Beckett.) (v, 1886) .....                                        | 267                    |
| Treatment of, for Use in Boilers. (P) Deeley and Archbutt. (xi, 1892) .....                                        | 595                    |
| Treatment of Foul. (P) Nicholson and Palmer. (ix, 1890) .....                                                      | 883                    |
| Treatment of Foul, by Liquor from Iron Pyrites Beds. (P) Kidd. (xii, 1893) .....                                   | 617                    |
| Treatment of Hard: (Archbutt and Deeley.) (x, 1891) .....                                                          | 511                    |
| (Langer.) (xi, 1892) .....                                                                                         | 543                    |
| Treatment of Softened. (P) Archbutt and Deeley. (xi, 1892) .....                                                   | 421                    |
| Typhoid Bacilli in Cistern, Detection and Isolation of. (Kotz.) (xii, 1893) .....                                  | 172                    |
| Unusual Form of Spring. (Stebbins.) (xi, 1892) .....                                                               | 834                    |
| Vitrified Ash for Purifying. (P) Cobley. (v, 1886) .....                                                           | 499                    |
| Waste, from a Water-Gas Scrubber. (Klaudy.) (xii, 1893) .....                                                      | 29                     |
| Waters, Aerated, Manufacture of: (P) Mewburn. From Bourcond. (vi, 1887) .....                                      | 297                    |
| (P) Saunders. (x, 1891) .....                                                                                      | 651                    |
| Analyses of the Mineral Los Baños. (Darapsky.) (vii, 1888) .....                                                   | 237                    |
| Analysis of certain Waste. (Koenig.) (iii, 1884) .....                                                             | 578                    |
| Apparatus for Filtering Polluted. (P) Candy. (xi, 1892) .....                                                      | 933                    |
| Apparatus for Purifying Waste. (P) Ives. (xiv, 1895) .....                                                         | 178                    |
| Application of Schaeffer's Nitrite Reaction to Examination of Drinking. (Deventer and Juergens.) (xii, 1893) ..... | 949                    |
| Artificial Mineral. (vii, 1888) .....                                                                              | 225                    |
| Cause of Action on Lead Pipes of various. (Müller.) (vii, 1888) .....                                              | 226                    |
| Chalybeate, Production of, by Electrolysis. (P) Webster. (viii, 1889) .....                                        | 289                    |

| Chemical Properties of, and Action on Dyes. (Knecht and Appleyard.) (viii, 1889) .....                          | 457  |
| Chemistry of Mordanting, with Potassium Bichromate. (Ganswindt.) (xiv, 1895) .....                              | 654  |
| Chlorination of. (Bulard.) (xiii, 1894) .....                                                                   | 1057 |
| Chroming of:                                                                                                    |      |
| (Knecht and Ward.) (ix, 1890) .....                                                                             | 58   |
| (Scurati-Manzoni.) (ix, 1890) .....                                                                             | 732  |
| Cleansing:                                                                                                      |      |
| (P) George. (x, 1891) .....                                                                                     | 918  |
| (P) Lake. From Cutter. (xii, 1893) .....                                                                        | 145  |
| Cleansing, and Apparatus therefor:                                                                              |      |
| (P) Robeson. (vii, 1888) .....                                                                                  | 206  |
| (P) Singer and Judell. (vii, 1888, 1891; viii, 1889) .....                                                      | 618  |
| Clearing, from Lime. (P) Nesbit. (vi, 1887) .....                                                               | 601  |
| Colouring Matters for Dyeing. (P) Imray. From Farbwerke vormals Meister, Lucius und Brüning. (xii, 1893) .....  | 1024 |
| Colours on Dyed, Detection of. (Dommergue.) (viii, 1889) .....                                                  | 216  |
| Colours, Permanent and Fugitive to Light. (Frusher.) (x, 1891) .....                                            | 833  |
| Composition for Oiling. (P) Heys. From Godabaux. (xiv, 1895) .....                                              | 167  |
| Composition of Grease from. (Buisine.) (v, 1884) .....                                                          | 539  |
| Compound for Cleansing and Bleaching. (P) Parker. (ix, 1890) .....                                              | 174  |
| Compound for Washing and Scouring. (P) Portella. (ix, 1890) .....                                               | 174  |
| Crude, Estimating Samples of. (P) Frayssé. (xi, 1892) .....                                                     | 518  |
| Destroying Vegetable Substances contained in. (P) Jarman. (iv, 1885) .....                                      | 454  |
| Destructive Action of Steaming on. (Scheurer.) (xii, 1893) .....                                                | 1025 |
| Dissolved. (Marek.) (iv, 1885) .....                                                                            | 410  |
| Dust. (Nessler.) (iv, 1885) .....                                                                               | 128  |
| Dyeing:                                                                                                         |      |
| (P) Gatty. (vi, 1887) .....                                                                                     | 541  |
| (P) Lake. From Guillot. (v, 1886) .....                                                                         | 532  |
| (P) Smith. (vi, 1887) .....                                                                                     | 286  |
| Dyeing, and Apparatus therefor:                                                                                 |      |
| (P) Cavailles. (x, 1891) .....                                                                                  | 606  |
| (P) Gedge. (v, 1886) .....                                                                                      | 533  |
| Dyeing, Application of Fluoride of Chromium in. (Lange.) (vii, 1888) .....                                      | 433  |
| Dyeing, Applic. of Indophenol to. (Cassella.) (i, 1882) ..                                                      | 405  |
| Dyeing, Blue. (P) Lohmann. (vi, 1887) .....                                                                     | 508  |
| Dyeing, Chromium Fluoride in. (x, 1891) .....                                                                   | 763  |
| Dyeing, in Copper Pans. (Weber.) (xii, 1893) .....                                                              | 118  |
| Dyeing, Indigo Vat for. (Lindenberg.) (vii, 1888) .....                                                         | 563  |
| Dyeing, Influence of Lime and Magnesia Waters in. (Becke.) (v, 1886) .....                                      | 530  |
| Dyeing Light Shades on. (Schnabel.) (xiii, 1894) .....                                                          | 388  |
| Dyeing, Method and Apparatus for. (P) Anderson and Hodgson. (viii, 1889) .....                                  | 283  |
| Dyeing, Mordants for. (Gardner.) (ix, 1890) .....                                                               | 286  |
| Dyeing, New Boiler System in. (Fritze.) (xii, 1893) ..                                                          | 40   |
| Dyeing or Printing on. (P) Holliday. (x, 1891) .....                                                            | 135  |
| Dyeing or Treating Bobbins of. (P) Gönard. (xii, 1893) ..                                                       | 827  |
| Dyeing, Production of Col. Mat. for. (P) Imray. From the Farbwerke vormals Meister. (x, 1891) .....             | 633  |
| Dyeing, Progress in. (Witt.) (xi, 1892) .....                                                                   | 602  |
| Dyeing, Progress in, Criticism on Witt's Paper on. (xi, 1892) .....                                             | 602  |
| Dyeing, Progress in, Reply to Criticism on Paper on. (Witt.) (xi, 1892) .....                                   | 602  |
| Dyeing, Use of Artificial Alizarin in. (St. Denis Dyes Co.) (iv, 1885) .....                                    | 673  |
| Dyeing, Use of Oxalic Acid in. (Korner.) (xiv, 1895) ..                                                         | 1044 |
| Dyeing, with Chromium Lakes. (P) Hoffmann. (xiii, 1894) .....                                                   | 884  |
| Dyeing, with Fast Colours. (P) Abel. From Farbwerke vormals Meister, Lucius und Brüning. (xii, 1894) .....      | 633  |
| Dyeing, with Sulphonic Acids. (P) Imray. From Farbwerke vormals Meister, Lucius und Brüning. (xiii, 1894) ..... | 884  |
| Extracting Deleterious Matters from. (P) Hanson. (xi, 1892) .....                                               | 810  |
| Extracting Fat from:                                                                                            |      |
| (P) Fahrig. (xiv, 1895) .....                                                                                   | 495  |
| (P) Lahusen and Feuerlein. (ix, 1890) .....                                                                     | 521  |
| (P) Treat and Henderson. (xi, 1892) .....                                                                       | 928  |
| Extracting Potash from Fat in Sheep's. (P) Richard-Lagerie. (xiv, 1895) .....                                   | 271  |
| Extracting Suint from. (P) Urquhart. From Richard-Lagerie. (xi, 1893) .....                                     | 1044 |
| -Fat, Analysis of. (Lewkewitsch.) (xi, 1892) .....                                                              | 134  |
| -Fat, Examination of. (Herbig.) (xiii, 1894) .....                                                              | 1068 |
| -Fat, Extraction of Wool-Wax from. (P) Jaffé and Darmstadt. (xi, 1892) .....                                    | 928  |
| -Fat, Fatty Matter from:                                                                                        |      |
| (P) Braun and Liebreich. (xi, 1892) .....                                                                       | 445  |
| (P) Ross. (x, 1891) .....                                                                                       | 709  |
| -Fat, Occurrence of Octylic Alcohol in Distilled. (Hannau.) (xi, 1892) .....                                    | 535  |
| -Fat, Preparation of Lanolin from Commercial. (P) Abel. (vi, 1887) .....                                        | 147  |
| -Fat, Processes of Obtaining. (Langbeck.) (ix, 1890) ..                                                         | 356  |

## PAGE

|                                                                                                                   |           |
|-------------------------------------------------------------------------------------------------------------------|-----------|
| Chemical Characteristics of Beer Manufactured from Pure. (Brämann.) (vi, 1887).....                               | 47        |
| Chemical Properties of an Alcoholic Extract of Brewers'. (de Ray-Pailhade)..... (ix, 1890), 756; (xii, 1891), 751 | 458       |
| Chinese. (Calmotte.) (xii, 1893).....                                                                             | 844       |
| Composition and Analysis of. (Gauchaud.) (xiii, 1894).....                                                        | 462       |
| Cultivated Wines. (Rommier.) (iv, 1885).....                                                                      | 113, 194  |
| Cultivation of Micro-Organisms with Special Reference to. (Morris.) (vi, 1887).....                               | 333       |
| Culture, Employment of Potatoes in. (Delbruck.) (i, 1882).....                                                    | 826       |
| Culture, Hansen's System of. (Jørgensen.) (xiii, 1894).....                                                       | 333       |
| Culture, Influence of Aspiracin upon. (Birner.) (i, 1882).....                                                    | 1211      |
| Cultures, Behaviour of Sugars towards. (Fischer and Thierfelder.) (xiii, 1894).....                               | 289       |
| Detection of Bottom-Ferment, in Top-Ferment pressed Yeast. (Bau.) (xiv, 1895).....                                | 1056      |
| Distinguishing, from Beer Brewed from Malt and Malt Substitutes. (Wiedring.) (xiv, 1895).....                     | 704       |
| Dry, Production of: (P) Francke and Nycander. (xii, 1893).....                                                    | 1019      |
| (P) Geuge and Sigmond. (x, 1891).....                                                                             | 633       |
| Effect of Carbon Dioxide on. (Foth.) (viii, 1889).....                                                            | 256       |
| Effect of Tartaric Acid on Brewery. (Hansen.) (xi, 1892).....                                                     | 389       |
| Effects of Air on Beer-. (Cochin.) (ii, 1883).....                                                                | 1056      |
| Effront's Hydrofluoric Acid Treatment of. (Cluss.) (xiv, 1895).....                                               | 777       |
| Effront's Method for Purification of. (Jørgensen and Holm.) (xii, 1893).....                                      | 777       |
| Fermentations of the Jerusalem Artichoke, Pure. (Levy.) (xii, 1893).....                                          | 777       |
| Fermentation with, and Treatment with Hydrofluoric Acid. (Cluss.) (xiv, 1895).....                                | 52        |
| Foaming Fermentations and Pure. (xiv, 1895).....                                                                  | 174       |
| From Potatoes, Manufacture of Solid. (P) Schuster. (i, 1882).....                                                 | 243       |
| From Unbrained Corn. (Schuster.) (i, 1882).....                                                                   | 333       |
| From Unsteamed Potatoes. (P) Wehmer. (i, 1882).....                                                               | 419       |
| German, Manufacture of. (P) Bonne. (ix, 1890).....                                                                | 403       |
| Gluten Particles in. (Will.) (xiii, 1894).....                                                                    | 967       |
| Green and Maize Malt for Manufacture of. (vii, 1888).....                                                         | 637       |
| Gum. (Salkowski.) (xiii, 1894).....                                                                               | 1213      |
| Hansen's Method of Detecting Contamination of. (Holm and Poulsen.) (vi, 1887).....                                | 556       |
| Hydrofluoric Acid and Lactic Treatment of. (Scheibner.) (xiv, 1895).....                                          | 1056      |
| Hydrolysis of Maltose by. (Morris.) (xiv, 1895).....                                                              | 499       |
| Hydrolytic Functions of. (O'Sullivan.) (xi, 1892).....                                                            | 628, 1021 |
| Influence of Alcohol in Development of. (Hayduck.) (i, 1882).....                                                 | 333       |
| Influence of Chemical Conditions on Activity of. (Effront.) (xii, 1894).....                                      | 267       |
| Influence of Compounds of Fluorine on Beer-. (Effront.) (xii, 1894).....                                          | 968, 1079 |
| Inversion of Maltose and Isomaltose by. (xiv, 1885).....                                                          | 671       |
| Limit of Detection of Wild-. (Holm and Poulsen.) (viii, 1889).....                                                | 471       |
| Mashing Process for Preparation of. (P) Burrow. (i, 1882).....                                                    | 419       |
| Microscopic Examination of. (Lindner.) (viii, 1889).....                                                          | 300       |
| Natural Pure Culture of. (Delbruck.) (xiv, 1895).....                                                             | 669       |
| Of High Attenuative Power. (Van Laer and Denamur.) (xiv, 1895).....                                               | 817       |
| Poisons. (Schulz.) (viii, 1889).....                                                                              | 471       |
| Preparation of. (i, 1882).....                                                                                    | 332       |
| (P) Boulé. From The Société Générale de Maltose. (x, 1891).....                                                   | 561       |
| (P) Gruson. (iii, 1884).....                                                                                      | 115       |
| Preparation of Extracts for Manufacture of. (P) Thompson. From Nycander. (xi, 1892).....                          | 1023      |
| Preparation of, from Whey. (Kokosinski.) (i, 1882).....                                                           | 363       |
| Preservation of: (P) Collette. (xiv, 1895).....                                                                   | 175       |
| (Reinke.) (vii, 1888).....                                                                                        | 858       |
| Preservation of, for Transport. (P) Heron. (xiii, 1894).....                                                      | 168       |
| Prevention of Second Fermentation of. (P) Offen and More. (vii, 1883).....                                        | 131       |
| Production and Preservation of Pure. (P) Newton. From La Société Anonyme La Levure. (xi, 1892).....               | 931       |
| Production of: (P) Bartlett and Pearsall. (xiv, 1895).....                                                        | 765       |
| (P) Bruce. (ix, 1890).....                                                                                        | 538       |
| (P) Claudon and Vigreux. (iii, 1884).....                                                                         | 114       |
| (P) Huntley. (vii, 1888).....                                                                                     | 688       |
| (P) Jensen. (i, 1882).....                                                                                        | 188       |
| (P) Lake. From Bruun. (x, 1891).....                                                                              | 940       |
| (P) Lederer. (ix, 1890), 880; (xiii, 1894).....                                                                   | 827       |
| (P) Myers. (xii, 1893).....                                                                                       | 535       |
| (P) Polsky. (xii, 1894).....                                                                                      | 53, 268   |
| (P) Reid. (xii, 1893).....                                                                                        | 614       |
| (P) Schlagenhauer and Blumer. (xi, 1892).....                                                                     | 639       |
| (P) Squire. (v, 1886), 542, 543, 544; (vi, 1887), 297, 514; (viii, 1889), 57; (xiii, 1894).....                   | 1082      |
| (P) Thompson. From Nycander and Francke. (xi, 1892).....                                                          | 1022      |
| (P) Walker. (vii, 1888), 224; (xi, 1892).....                                                                     | 700       |
| Production of Dried, and Production of Vinegar. (P) Forbrel. (x, 1891).....                                       | 265       |

| (P) Peters. (x, 1885).....                                                            | 434  |
| Receivers. (P) Leaker and Howell. (x, 1891).....                                      | 843  |
| Recovery and Utilisation of. (P) Campbell. (x, 1891).....                             | 265  |
| Respiration of, at Different Temperatures. (Gréchant and Quinquand.) (vii, 1888)..... | 686  |
| Starch in Pressed, Determination of. (Filsinger.) (xii, 1894).....                    | 908  |
| Studies on: (Effront.) (xi, 1892).....                                                | 50   |
| (Elion.) (xiii, 1894).....                                                            | 296  |
| Treatment of: (P) Cave. (xiii, 1894).....                                             | 1214 |
| (P) Leconte. (x, 1891).....                                                           | 266  |
| Use of, in Estimation of Fermentable Substances. (Bau.) (xii, 1893).....              | 871  |
| Use of Lactic Acid Process in Manufacture of. (Wittelschofer.) (xiv, 1895).....       | 1056 |
| Use of Pure, in Top Fermentation. (van Laer.) (xiv, 1895).....                        | 52   |
| Utilising and Treating. (P) Greening. (xiii, 1894).....                               | 1082 |
| Valuation of Pressed. (Gintl.) (iv, 1885).....                                        | 596  |
| Wine-. (Rommier.) (xi, 1892).....                                                     | 171  |
| Wine-, Origin of. (Jørgensen.) (xiv, 1895).....                                       | 591  |
| Yeasts and Bacteria, Study of Fermentation. (Ward.) (x, 1892).....                    | 255  |
| Different, found in Distilleries. (vii, 1888).....                                    | 687  |
| Employment of, in Wine Prod. (Fabr.) (xiii, 1894).....                                | 1213 |
| Enzymes of some. (Fischer and Lindner.) (xiv, 1895).....                              | 1056 |
| Estimation of Isomaltose, by Sazs and Froberg. (Munsche.) (xiv, 1895).....            | 590  |
| Fermentation of Beers with Sazs and Froberg. (Munsche.) (xiv, 1895).....              | 672  |
| Fermentation of Cane Sugar with Pure. (Hiepe.) (xiv, 1895).....                       | 763  |
| Fermentation of Raffinose in Presence of Various. (Loiseau.) (ix, 1890).....          | 202  |
| High- and Low-Attenuating. (Windisch.) (xiv, 1895).....                               | 53   |
| Infection by Wild, Overcome. (Boch and Co.) (xiv, 1895).....                          | 591  |
| Investigation on Pure. (Wortmann and Aderhold.) (xiv, 1895).....                      | 763  |
| Morphology of German Wine-. (Aderhold.) (xiv, 1895).....                              | 817  |
| Study of. (Hautefeuille and Perrey.) (xii, 1891).....                                 | 654  |
| Yellow Fever, Use of Cocaine in. (viii, 1889).....                                    | 916  |
| Yew Tree, Taxine, the Alkaloid of the. (Hilger and Brande.) (ix, 1890).....           | 542  |
| Ylang-Ylang, Essence of. (Reichler.) (xiii, 1894), 758, 1085                          | 223  |
| Production of. (T.R.) (ix, 1890).....                                                 | 387  |
| Yorkshire College, Chair of Experimental Physics in. (i, 1882).....                   | 903  |
| Younger and Co.'s Brewery, Visit to. (xiii, 1894).....                                | 703  |
| Yttria Minerals, Occurrence of. (T.R.) (viii, 1889).....                              | 314  |
| Yucatan, Commercial Importance of. (T.R.) (viii, 1889).....                           | 659  |
| Development of. (T.R.) (ix, 1890).....                                                | 122  |
| Heneguen Production in. (T.R.) (ix, 1890).....                                        | 776  |
| Sisal Grass of. (T.R.) (xi, 1892).....                                                | 469  |

| Chloride, Production of, by Electricity:                                                                     |          | For Galvanic Batteries. (P) Mosley. (x, 1891).....                                                           | 554  |
| (P) Paget. (viii, 1889).....                                                                                 | 289      | Free from Arsenic, Preparation of. (Stolba.) (iii, 1884).....                                                | 486  |
| (P) Parker and Robinson. (xii, 1893).....                                                                    | 276      | From Flue Dust of Furnaces. (Jensch.) (x, 1891).....                                                         | 142  |
| Chloride Solutions, Purification of. (P) Brock and others. (xiv, 1895).....                                  | 974      | From Ores containing Sulphide of Zinc. (P) Perino. (vii, 1888).....                                          | 678  |
| Chromates, Chemistry of. (Weber.) (x, 1891).....                                                             | 711      | From Zinc Refuse, Extraction of. (i, 1882).....                                                              | 27   |
| -Coated Iron Water-Pipes. (Bunte.) (vi, 1887).....                                                           | 557      | Furnace for Production of:                                                                                   |      |
| -Coated Wire, &c., Manufacture of. (P) Cowper-Coles Galvanising Syndicate and Cowper-Coles. (xiv, 1895)..... | 1048     | (P) Kleeinan. (iv, 1885).....                                                                                | 56   |
| Coating Articles with. (P) Stürzel. (xii, 1893).....                                                         | 695      | (P) Nenendahl. (iv, 1885).....                                                                               | 55   |
| Coating Metals with. (P) Gutensohn. (v, 1886).....                                                           | 452      | Furnace for Reducing. (P) Nawrocki. From Quaglio, Pintsch, and Lentz. (iii, 1884).....                       | 639  |
| Coating Sheet Metal with. (Koller and Zwierzina.) (v, 1886).....                                             | 452      | German Production of. (T.R.) (xiii, 1894).....                                                               | 74   |
| Coating, to prevent Corrosion. (P) Haswell. (x, 1891).....                                                   | 146      | Hunicke's Process for Smelting Silver Lead Ores containing. (xii, 1893).....                                 | 357  |
| Collecting Metallic, from Vapours, and Apparatus therefor. (P) Walsh. (viii, 1889).....                      | 549      | Hydrate, Separation of. (P) Sener. (vii, 1888).....                                                          | 845  |
| Containing Arsenic, Purification of. (L'Hôte.) (iv, 1885).....                                               | 284      | In Acetic Acid, Presence of. (Hahn.) (ii, 1883).....                                                         | 413  |
| Containing Lead, Behaviour of, on Melting. (Knut.) (v, 1886).....                                            | 537      | In Dolomite, Diffusion of. (Dieulauf.) (ii, 1883).....                                                       | 159  |
| Co-operation of Water in Oxidation of. (Trambe.) (iv, 1885).....                                             | 675      | In Neutral Solution, Quantitative Determination of. (Lohr.) (ii, 1883).....                                  | 428  |
| Copper Sulphate as an Indicator in Titration of. (Moldenbauer.) (ix, 1890).....                              | 108      | In New South Wales. (T.R.) (xii, 1893).....                                                                  | 959  |
| Corrosion of, in Contact with Brick. (ix, 1890).....                                                         | 1037     | In Ores containing Iron and Manganese, Volumetric Estimation of. (Fahlberg.) (i, 1882).....                  | 276  |
| Corrosion of, in Contact with Cement. (Segez.) (x, 1891).....                                                | 149      | In Preserved Foods. (Allen.) (xi, 1892).....                                                                 | 363  |
| Deposition of Nickel upon. (Meidinger.) (ii, 1883).....                                                      | 478      | In the United States. (T.R.) (vii, 1888).....                                                                | 589  |
| Desilverisation of. (Rössler and Edelmann.) (x, 1891).....                                                   | 550      | In Zinc-dust, Volumetric Estimation of. (Weil.) (vi, 1887).....                                              | 147  |
| Desilverisation of Lead by. (Rössler and Edelmann.) (x, 1891).....                                           | 932      | Industry on the Increase. (T.R.) (viii, 1889).....                                                           | 484  |
| Determination of:                                                                                            |          | Lead, and Silver, Separation and Estimation of. (Aubin.) (xi, 1892).....                                     | 775  |
| (Losekann and Meyer.) (v, 1886).....                                                                         | 502      | -Lead Ores, Electro-Chlorination of. (vii, 1888).....                                                        | 572  |
| (Moldenbauer.) (x, 1891).....                                                                                | 574      | -Lead Process, The F. L. Bartlett. (Hawker.) (xiii, 1894).....                                               | 41   |
| (Shimer.) (xiv, 1895).....                                                                                   | 510      | -Lead-Sulphide Ores, Treatment of. (P) Fell. From Emmens Zinc Co. (xiii, 1894).....                          | 402  |
| Estimation of, as Amalgam. (Vortmann.) (x, 1891).....                                                        | 1036     | -Lead Sulphides, Ashcroft Process for Treating. (xiv, 1895).....                                             | 774  |
| Estimation of, as Pyrophosphate. (Jawein.) (vi, 1887).....                                                   | 523      | -Lead Sulphides, Treatment of Argentiferous. (Schnabel.) (xi, 1892).....                                     | 821  |
| Estimation of, by Classen's Oxalate Method. (Nass.) (ix, 1890).....                                          | 69       | Manufacture, Estimation of Cadmium in Products of. (Minor.) (ix, 1890).....                                  | 554  |
| Estimation of, by Ferric Hydrate. (Minor.) (ix, 1890).....                                                   | 109      | Muffles, Formation of Cast-Iron in. (Jensch.) (xiii, 1894).....                                              | 398  |
| Estimation of, in Ores. (xi, 1892).....                                                                      | 846      | Nickel Plating of. (Ehremeyer.) (iii, 1884).....                                                             | 486  |
| Estimation of, in Pure Zinc Sulphate Solutions. (vi, 1887).....                                              | 495      | Obtaining, by Electrolysis:                                                                                  |      |
| Difficult Solubility of Pure, in Acids. (Weeren.) (x, 1891).....                                             | 95       | (P) Elmore. (x, 1891).....                                                                                   | 146  |
| Distillation of. (Steger.) (v, 1886).....                                                                    | 607      | (Lake.) (i, 1882).....                                                                                       | 111  |
| Dust, Analysis of. (Meyer.) (xiii, 1894).....                                                                | 841      | (P) Seagall. (ix, 1890).....                                                                                 | 520  |
| Dust of Cillier, Cadmium in. (iii, 1884).....                                                                | 523      | Obtaining Compounds of, for Pigments. (P) French. (x, 1891).....                                             | 1015 |
| Dust Reactions. (Schwarz.) (v, 1886).....                                                                    | 391      | Obtaining, from its Ores. (P) Squire and Currie. (vi, 1887).....                                             | 734  |
| Dust, Valuation of:                                                                                          |          | Obtaining, from Waste Liquors. (xi, 1892).....                                                               | 613  |
| (Bach.) (xiii, 1894).....                                                                                    | 765      | Obtaining, from Zinc Oxide. (P) Squire and Currie. (vi, 1887).....                                           | 731  |
| (Fräkel.) (xii, 1893).....                                                                                   | 65       | Ore, Producing Chlorine and Zinc from. (P) Lea and Hammond. (vi, 1887).....                                  | 664  |
| (Klemp.) (ix, 1890).....                                                                                     | 968      | Ores and Residues, Treatment of. (P) Clark. From Costes and others. (xi, 1892).....                          | 362  |
| Electro-Deposition of:                                                                                       |          | Ores, Apparatus for Reduction of. (P) Imaghi. (x, 1891).....                                                 | 145  |
| (P) Cowper-Coles and Walker. (xiii, 1894).....                                                               | 1067     | Ores, Desulphurising. (P) Hart. (xi, 1892).....                                                              | 923  |
| (Heathfield and Rawson.) (xiv, 1895).....                                                                    | 756, 874 | Ores, Electrolytic Treatment of. (Swinburne.) (xi, 1892).....                                                | 824  |
| (Richter.) (iv, 1895).....                                                                                   | 874      | Ores, Examination of. (Minor.) (ix, 1890).....                                                               | 417  |
| Electrolytic Extraction of:                                                                                  |          | Ores, Method and Apparatus for Reducing. (P) Walsh. (vi, 1887).....                                          | 600  |
| (P) Abel and Jarry. From Siemens and Halske. (xii, 1894).....                                                | 698      | Ores, Method and Apparatus for Treating. (P) West. (xi, 1892).....                                           | 351  |

| (P) Ruck and Ragzatt. (xii, 1893) .....                                                                     | 767  |
| Smelting at the Bertha Works, Virginia. (Moxham.) (xiii, 1894) .....                                        | 41   |
| Smelting, Hempel's Experiments on. (xiii, 1894) .....                                                       | 814  |
| Smelting, Influence of Sulphur in. (Voigt.) (viii, 1889) ..                                                 | 986  |
| Smelting, Treating Residues from. (P) Cook and Pette. (xii, 1893) .....                                     | 695  |
| Statistics, German. (T.R.) (x, 1891) .....                                                                  | 959  |
| Sulphate, Action of Sulphuretted Hydrogen on. (Bau- bigny.) (viii, 1889) .....                              | 216  |
| Sulphate and Carbonate, Manufacture of. (P) Worthing- ton. (vii, 1888) .....                                | 36   |
| Sulphate and Sodium Chloride Solutions, Action of, on Plants. (Storp, König, and others.) (iii, 1884) ..... | 416  |
| Sulphide and Ammonium Chloride, Production of. (P) Kenyon. (vi, 1887) .....                                 | 822  |
| Sulphide, Improvements in Manufacture of White. (P) Gunn. (vi, 1888) .....                                  | 38   |
| Sulphide, Influence of Temperature on Transformation of Amorphous. (Villiers.) (xiv, 1895) .....            | 373  |
| Sulphide, Manufacture of:                                                                                   |      |
| (P) Claus. (ii, 1883) .....                                                                                 | 476  |
| (P) Geary. From Keller. (viii, 1889) .....                                                                  | 468  |
| (P) Johnson. From Macfarlane. (iv, 1885) .....                                                              | 536  |
| (P) Knight. (iv, 1885) .....                                                                                | 595  |
| (P) Spence. (v, 1886) .....                                                                                 | 602  |
| (P) Wilson. (viii, 1889) .....                                                                              | 119  |
| Sulphide, Manufacture of, and Apparatus therefor. (P) Grimshaw and Kenyon. (vii, 1888) .....                | 388  |
| Sulphide, Manuf. of Anhydrous. (P) Hill. (iii, 1884) ..                                                     | 415  |
| Sulphide, Obtaining, from Solutions. (P) Dennis and Glendinning. (vi, 1887) .....                           | 440  |
| Sulphide, Titration of, with Iodine. (von Berg.) (vi, 1887) ..                                              | 384  |
| Thallium in Commercial. (Kosmann.) (v, 1886) .....                                                          | 403  |
| Trade in. (T.R.) (xi, 1892) .....                                                                           | 80   |
| Trade, Statistics of the Sheet. (T.R.) (xiv, 1895) .....                                                    | 90   |
| Treating Calamine, &c., for Extraction of. (P) Haeffner. (xiv, 1895) .....                                  | 581  |
| Treatment of Silver and Gold Ores containing. (P) Pen- rose. (xii, 1893) .....                              | 522  |
| Use of Iron instead of, for Construction of Voltaic Bat- teries. (Coleman.) (iv, 1885) .....                | 7    |
| Volumetric Determination of:                                                                                |      |
| (Donath and Hattensaur.) (ix, 1890) .....                                                                   |      |
| (Mahon.) (i, 1882) .....                                                                                    |      |
| (Voigt.) (viii, 1889) .....                                                                                 |      |
| Volumetric Estimation of:                                                                                   |      |
| (Balling.) (ii, 1883) .....                                                                                 |      |
| (Hinman.) (xii, 1893) .....                                                                                 |      |
| (Lesceur.) (xiv, 1895) .....                                                                                |      |
| Volumetric Estimation of Salts of. (Barthe.) (x, 1891) .....                                                |      |
| Waste, Ammonia from. (P) Reinecken. (iv, 1885) .....                                                        |      |
| -White, German Trade in. (T.R.) (xiii, 1894) .....                                                          |      |
| -White Industry in Germany. (T.R.) (ix, 1886) .....                                                         |      |
| -White, Production of:                                                                                      |      |
| (P) Cobley. (xii, 1893) .....                                                                               |      |
| (Schnabel.) (i, 1882) .....                                                                                 |      |
| Works, Utilisation of Sulphurous Acid in. (i, 1882) .....                                                   | 501  |
| World's Production and Consumption of. (i, 1882) ..                                                         |      |
| Zincammonium Compounds, Manuf. and Application of. (Wright.) (iii, 1884) .....                              |      |
| Zircon in the United States in 1885. (viii, 1889) .....                                                     |      |
| Zirconia as a Substitute for Lin. for Lighting. (Kochs.) (x, 1891) .....                                    |      |
| Zirconium Salts, Obtaining from Ore. (P) Imray. F. MacKean. (ix, 1890) .....                                |      |
| Zone Reactions, Sensitiveness of, and Use of. (Trey.) (xiv, 1895) .....                                     | 59   |
| Zsigmondy and Benedikt's Process for Examination of Glycerin. (Sulman and Berry.) (v, 1889) .....           | 177  |
| Zurich, Efficiency of Sand-Filters at. (xi, 1892) .....                                                     | 364  |
| (Bertschinger.) (viii, 1889) .....                                                                          | 998  |
